

COMMERCIAL HIGH LIGHTS

Since 1941, when the commercial department first opened in Bailey School, approximately 150 students have taken typing. This is an average of 30 students each year with 14 machines in use.

Pansy Rae Bissette, Mary Evelyn Glover, Gladys Phillips, and Faylene Morgan, shorthand students, are taking dictation at 60 words per minute on familiar material.

Typing students have been typing business letters. Examples of the various styles were brought by the students and criticized by the students and teacher. Folding the letter and addressing the envelope were included in their study.

As yet the new typewriters that were expected at Christmas have not arrived.

Value Of Typing, Shorthand

Only a few years ago high school boys and girls did not have an opportunity to study shorthand and typing in public schools. Today almost every school teenager may take this course if he desires.

Although some of these students plan never to take up secretarial work as a career, they realize that typing will help them in whatever they might choose as a lifetime profession.

It is said, though, that more than half of the high school graduates take up secretarial work because of the many opportunities for well-trained persons in the business world.

The commercial training period is short. P.F.
