Typing II Doing  
Actual Work Situations

Typing II students have the privilege of being exempted from each of the six-weeks-period tests if they do six hours of additional work, including work on BUGLE, mimeograph, and other types of stenographic work.

These extra hours will furnish the students with actual work situations.

Class To Visit Dairy

Following their study of dairying and dairy products, the geography class expect to visit Southern Dairies in Wilson.

This opportunity comes as a courtesy of Mr. Shumake, manager of Southern Dairies.

Geo. Class Hears Talk

Miss Wilma Johnson, history teacher, relates events of her trip to Mexico last summer to the geography class prior to their study of Mexico.

Additional information was read by their teacher, Mrs. L. Lassiter, The students climaxed their study with a discussion of facts presented.

Ninth Girls Continue  
Leading In Grade Av.

Tying for first place in the last six-weeks report of the first semester was geometry and journalism, each having a 93 average, while the tenth grade agriculture class headed the list for exam averages with 89. Ninth girls lead in third grading period.

General business ranked second for the third grading period with 90, followed closely by shorthand and agriculture eleven and twelve with 88.

An average of 87 came next supported by French I and II and agriculture ten.

LOWER GRADES

Seventy-nine was the lowest average for the third six weeks. Those classes having this average were algebra, English I, and physics.

Exam averages ranged from agriculture ten with 89 to algebra with 63. Having an 88 average, shorthand was second on this list with home economics eleven averaging 87.

Thelma Creech, Barbara Farmer, Jean B. Glover, ninth girls; Lenzie Morgan, ninth boys; Beth Bissette,
