

Visiting The Commercial Department - Bernease Latmon
GEOGRAPHY TYPING DEPARTMENT

In keeping with one of the newest trends of education, the use of audio-visual aids, Mrs. Laurine Lassiter, junior home room teacher, showed her commercial geography class the movie, "Conservation of Natural Resources," after completing the unit Nature's Gifts To Our Lands.

GENERAL BUSINESS

After finishing a unit on travel, the general business class saw Clear Track Ahead, a sound motion picture story of the progress in railroad history.

Objectives to be gained from seeing this picture were an appreciation of the importance of railroads to a country, the understanding of the complexity of a railroad system, and information on the operation and maintenance of railroads, and the insight into "behind the scenes" work which makes good railroad service profitable.

"Plans are being made", states Mrs. Lassiter, "to use additional films as other units are completed."

Two additional typewriters have been purchased for the commercial department. One of the machines is a new Remington with elite type; the other, a used Royal.

The department now has 16 machines, all of which have been cleaned and have had new ribbons put on them.

The new Remington will make it possible for an additional person to assist in cutting stencils for the BAILEY BUGLE.

WILSON THEATRE

SUN MON.
Hedy Lamar
Dennis O'Keefe
DISHONORED LADY

TUES, WED.
