

Fashions, Fancies, And Frills - By Bernease Eatmon Hats - Where A Woman Shines!

Gay Hats.....
Nearly all the hats are loaded with flowers this spring. (Macy's in New York has a preservative enabling one to make flowers last indefinitely. One can change the flowers to match the costume.) Some have broad brims and tie under the chin, reminiscent of the olden days when old cars were seen jogging down the road. (Wonder if the old duster will come back?)

Becoming hats.....
Others remind one of grandmother's poke bonnet with ribbons and flowers under the brim. The more color and ribbon, the more popular and stylish it is. **Other hats.....**
Every hat tells a story. For instance, the hat with the wide brim shows that the person wearing it is jovial and big-hearted. Then there is the round and petite hat for the small and quiet lady. Many like to be reminded of the olden days; consequently they wear bonnets with plumes and ribbons. **Substitute hats.....**
And last, there is the girl who doesn't care to wear a hat at all. She only wears a hat when the occasion demands. Some of her "substitute" hats may be ribbons or flowers.

IT'S SHOCKING

I looked into the window where
I thought there should be things to wear.

But, No! Before my wondering eyes
Were flowers, pastries, cakes, and pies.

I looked again and there I saw
Both fowls and fruits, nuts and papaw.

And dishpans, washpans, birds and bees,
And steeples, gardens, fish nets, trees.

A madman must design those things
Designed for Easter and for spring.

Have you guessed what I'm hinting at?
Well, simply this, a woman's hat! F. Lewis
