

Fashion Trends - By Jackie Vicke

"FANCY PANTS."

Boys! At last! Fashion-minded personalities have designed some clothes that might become just a fad, or a truly new style in boys' clothing. They are the three-toned trousers, or, fashionably speaking, "fancy pants." These trousers have, for example; brown legs, green cuffs, and yellow or tan pockets. Later on, however, there will be plaids matched with solid colors and many contrasting colors. Now that this new addition to the earlier-styled-plaid vests and caps has been presented, we girls will have to be careful. You boys will be running a close race in fashion.

"SLIMMER LINES"

Here is news for you, girls! If those tight or straight skirts of yours are too straight, you had better get busy! The latest fashion trend shows that skirt and suit styles of 1951 are going to have slimmer lines, but not "clingy." They will be made to fit according to the wear they are expected to take; that is, moving around, walking, sitting, and standing. These skirts and suits will be "roomy", even though the lines are slimmer.

COLORS

In addition to slimmer lines, there are new colors--cream-grey, tobacco, sky-green, blue-green, sandy-yellow, and yellow-green. The purpose of these lines and new colors are to give the look of sophistication, wise choice, and proof of good taste to fashion-minded people.

The school had its first fire drill Thursday, January 4.

When Silence Isn't Gold
While loading a school bus one afternoon, Mrs. Frances Rouse requested a little boy to move out of her way three times without any move or comment from him. When she firmly demanded again that he move, he shyly replied, "You're standing on my shoe string."
