

County Sets Next Year For New Home Economics Building

For the first time in the history of the school, next year, if all plans materialize, there will be a separate building comprising the home economics department and lunch room.

This building, financed by county funds and to be started in March 1952, will be at the rear of the auditorium facing the agriculture building.

It will be connected to the present building by a covered walk, so that students will be protected from the weather.

SCIENCE LAB

The old home economics department will be used as a science room. The new lunch room will be large enough to accommodate half of the student body at one time.

Thompson and Sorrel of Rocky Mount are the architects.

Mr. M. W. Weaver reports that future plans call for toilets to be placed at each end of the hall up stairs for the benefit of the high school students.

School Attains Paved Drive

"Not a speedway, but an all weather drive," is the explication made by M. W. Weaver, principal, concerning the newly paved drive in front of the school.

Paving of the drive was accomplished by the state with expenses taken from it's road fund.
