Journalists Plan Trip To Nation's Capitol

As a reward for nine months of long, hard work and a possible incentive to other students to take the journalism course, Principal M. W. Weaver and Bugle advisors, Mrs. A. H. Farmer and Mrs. L. T. Lassiter, feel that the staff deserves a jaunt to Washington, D. C.

Leaving by car on April 24 for a four-day trip, ten journalists and their advisors will have a mapped-out itinerary that will enable them to see all the important sights of interest in the capitol city.

Because of the expensiveness of the trip to New York for the Press Convention, the Bugle treasury would not permit the

staff to attend. However, the surplus money made by the staff this year is sufficient to help defray expenses for the Washington trip.

Tobacco Company Sends Complimentary Pages

People receiving copies of the article featuring the March P. T. A. Open House in the Rocky Mount Evening Telegram owe their thanks to the Watson Tobacco Company of Rocky Mount.

Because the order for the papers was misplaced and, thereby, never received in the Circulation Department of the paper, the number of papers desired could not be furnished. However, the Watson Tobacco Company sent 100 pages cut from their copies with their compliments to the school, thus eliminating the cost of the complete paper.

Pre-School Clinic Largest In History

Forty five pre-school children made up the largest pre-school clinic, March 26, ever held in this school.

After he had presented his birth certificate, each child was given a thorough physical examination: ears, eyes, throat, teeth, weight, and height. They were then given the

vaccination they needed; diphtheria, small pox, or typhoid.

There were two nurses and one doctor to take care of all the children.

Fifty children are expected to enter the first grade here at the beginning of school next fall.

Plans Mature For New Building

Plans for the new home economics and cafeteria building were completed at the April 1 meeting of the local school board, Superintendent L.S. Inscoe, and Architect Thompson.

The State Lunchroom Supervisor presented plans for the lunchroom that called for a seating capacity of 185. The kitchen will be walled off from the cafeteria.

In the front entrance lavatories will be built. A storage space of 10 x 18 feet will be available. A covered walk will connect the building with the school.

According to the plans proposed by the Home Economic Supervisor for the home economics department, there will be three planned cooking units: one equipped with a gas stove; another with electric stove; and the third, an oil stove.

Mrs. Finch Lauds Classes

It is always a pleasure to mingle with well trained young people. I have enjoyed working with the students as substitute teacher. Indeed they reflect much credit upon their teachers.
