

Librarian Recommends Grading Permits Changes In Playground Procedure In Library

Library supervisor, IDALIA OGLESBY, submits for year suggestions relative to library procedure and handling of books.

The high school library opened with an addition of two new books. Miss Oglesby stresses the point that all books should be handled with care because of the expense and time for repairs of damages.

Books which are helpful to students in their studies are portrayed on the bulletin board.

MAGAZINES

Ten magazines are in the school library for student's use and pleasure at all times. Also are three different newspapers: THE NEWS AND OBSERVER, THE BAILEY NEWS, and THE NASHVILLE GRAPHIC.

Books are loaned for a period of two weeks at the time. Persons keeping books overdue are charged two cents a day.

The money received in this way is used for repair of books, buying new books, and general care of the library.

STUDENT LIBRARIANS

Six different students expedite the work of the library by helping students to look up references, keeping books in alphabetical order, and checking the books out.

These assistants to the librarian are ELSIE RAY EATMON, ANN EARP, PEGGY LILES, SHELBY JEAN EATMON, BILLY LILES, PATRICIA DEW, BETTY LOU STALLINGS and JANE BURGESS.

Grading of the school ground during the summer at an approximate cost of \$850 makes possible additional playground for all students and the beautification of the front grounds.

The grounds at the west end of the building and those at the rear were graded and seeded.

These areas are now being used by the students for their games.

This new playground section makes it possible for the front grounds to be beautified.

It also is a means of eliminating the noise from the playground that disturbs the classroom work going on within the building.

Future plans call for a baseball field next spring on part of the newly graded grounds.

Principal M. W. Weaver states that a lawn mower

will be needed to keep the grass in front of the building cut.
