

## Elementary Grades Acquire Ditto Machine

Latest model Ditto machine is now in the principal's office for the use of elementary teachers.

This hand operated machine uses fluid to transfer the lettering or designs desired instead of stencils as used on the mimeograph machine.

A supply of carbons, which come with the machine, are economical, since the carbon can be used several times.

### COLORED CARBON

Different colored carbons for drawings may be used on the machine. Teachers can make their own carbons and work the machine themselves, thereby eliminating the need of interrupting high school teachers and students whenever a quantity of material is needed.

This machine, purchased through the local school funds, cost \$175.

## Class Organizes Club, Elects Officers

"Bailey Tar Heel Club", organized by Mrs. E. H. Paschall's fourth graders becomes the newest club of the grammar grades.

The main objectives of the club is to encourage the class members to help in improving the class room. The club will meet each Friday afternoon.

Kay Thompson heads the new organization as its president. Other officers are Gail Joyner, vice president, and Phyllis Manning, secretary and treasurer.

## Class Displays Solar System

To portray to students the size and distance of the planets from the sun is the objective of the colorful display in Miss Rachel Bissette's seventh grade class room.

Different colored balloons were blown to sizes proportional to the planets and strung across the room in the order of their distance from the sun, placed on the bulletin board.

Mercury, the closet planet to the sun, leads the other following planets: Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto.

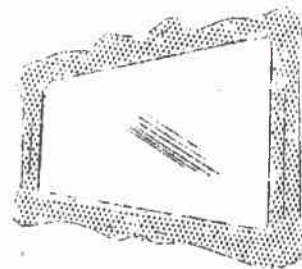

The class has also made a vivarium which contains different kinds of plants, moss, and a salamander.

14 students made all 3's in Mrs. E. M. Hagwood's room.
