

Lunchroom

(Continued from page 2)

walls.

The pantry or storage room, which is really a small room built in the corner of the kitchen, is lined with cabinets and shelves and sports a work table in the center of the room. The light blue color found in this room adds a note of cheer to the work that will be going on here.

CAFETERIA

Lunches will be served through a window opening into the entrance hall of the cafeteria. What probably is the greatest contrast between the old and new cafeterias is the stage at the extreme end of the cafeteria. This stage was built to be used as a platform for speakers and performers during banquets.

The cafeteria will be furnished with 30 beautiful yellow enamel topped tables. Each table will seat six persons, giving a total seating capacity of 180.

CHAIRS

The 30 inch high blonde chairs are just the same height of the 30 inch tables. By using chairs that have backs the same height of the tables, we have less chance of upsetting the plates when placing them on the table.

Three of the cafeteria walls are a light green while the remaining wall is a sunny yellow almost the same color of the table tops. This color scheme results in a cool, cherry, inviting eating

setting.

LIGHTING

"The lighting is far superior to any thing- we have ever had at Bailey," declares Principal Weaver. New indirect circle type light fixtures have been installed. Two - hundred watt bulbs are used in both rooms. The north side of the cafeteria is almost entirely windows. This, too, accounts for a great deal more light.

HEATING

In the kitchen there is one heating fan and an exhaust fan. The cafeteria has two heating fans and two circulating overhead fans. These fixtures keep the air circulating at the right temperature.

There are also two powder rooms for the cafeteria workers, one for the high school workers and one for Mrs. Lewis, Mrs. Strickland, and Mrs. Lamm. These rooms are a delicate pink.

This building was paid for by the county. The equipment was made possible by county, school, and P.T.A. funds.

Dept. Heads In Charge Of New Building

Holding sway in the new building will be Mrs. Kermit Lewis, supervisor of the cafeteria, and Frances Wilson, home economics teacher.

Both of these women have been consulted frequently by the contractor and those in charge of selecting the equipment as to any desired changes or additions needed.

Mrs. Lewis will have as her assistants Mrs. Everett Lamm and Mrs. E.O. Strickland.

Miss Wilson holds a B.S. Degree in home economics with a minor in Science from East Carolina College, class of 51.

Miss Wilson is a graduate of Plain View High School in Sampson County. She says that, since she liked home economics from the beginning of her high school days, her mind was made up as to her major before she entered college.
