VOL. 13, NO. 5, BAILEY, N. C., JAN., 1953

New Building Ready For Occupancy

Delay in receiving materials has accounted for the postponement of the moving into the new building earlier.

A stainless steel table to accompany the dishwasher in the new school cafeteria has been the greatest holdback for the occupancy of both the home economics department and lunchroom.

DUCHESS LINE TABLES

Late arrivals, also, were the 30 Dutchess Line tables with formica tops that resist burning, chipping, and staining. They were accompanied by 180 maple chairs.

Greek sky beige and heath mix brown make up the color scheme for the floor of the home economics department, and a screen has been added recently for use in changing dresses while taking up the sewing unit.

Glee Club Planning Spring Program

Plans for a spring GLEE CLUB program are being made by M. W. WEAVER, principal, and MUSIC TEACHER, MISS NANCY DICKENS.

Variety, classical, and popular music will be included in the program. Other plans are indefinite.

Time, date, and other details will be decided upon at a later date.

Principal Previews 1953

Looking into the year, 1953, Principal M. W. Weaver names three goals, either anticipated or to be striven toward.

These goals are to get into the new building, improve the attendance, and to show the students they have to make some effort to pass their work.

Further discussing attendance, Weaver says special efforts have been taken toward improving this phase of the school.

As the principal reviewed the year as a whole, he affirms, "We have one of the strongest high school faculty in quite a few years."

Exhibit Challenges One's Reading Interest

Out to the cow country the library bulletin board takes the students in an effort to entice them to "lasso" books for reading.

Book covers and a cowboy lassoing WANT TO ROUND UP A GOOD BOOK give the students a key to books that are beneficial for reading.

The names of some of the profitable books are A LANTERN IN HER HAND, KING'S MAN, ROBERT LOUIS STEVENSON, NEW SONG IN A STRANGE LAND.

Srs. Attempt Discovery of Interests By Tests

Seniors have been taking ability and interest tests this month to test their capabilities, aptitudes, and likes. C.H. FRIES, JR., assistant county superintendent, conducted the tests.

The first test, THE AMERICAN COUNSEL ON EDUCATION PSYCHOLOGY, was to determine the aptitudes of the students.

To reveal the real interest of the students, THE KUDER PREFERENCE RECORD was taken.

After the tests were given, FRIES showed a movie bringing out the difference between ability and interest.

The purpose of taking these tests was for guidance and counsel.

Bailey Hopes To Gain Extra Teacher For H.S.

If the high school attendance for the next two months equals that of the last four months, there is a possibility of Bailey's gaining an additional high school teacher.

This possibility hinges on the allotment of teachers for next year being the same as this year.

For the first four months Bailey has met this year's requirements for an extra teacher and has one pupil to spare.

PRINCIPAL M. W. WEAVER in discussing the results of having another teacher pointed out that large classes could be divided and additional subjects added.
