

## Typists Tackle Mystery Puzzles

As a variation from the regular assignments, typing I students are typing designs from a typewriter mystery book.

The book gives the pupil instructions on how to make the designs, but he doesn't know what he has been making until he has finished.

## "Experience Is Best Teacher"

Bookkeeping I class, according to Instructor Laurine T. Lassiter, is getting its first bit of practical experience by working the R. L. Dean's wholesale practice set. This set is concerned with proprietorship.

## Special Editorial

## Look What March of Dimes Has Done For Bailey

If you don't realize what a worth-while organization the MARCH OF DIMES is, look around you at what it has done in Bailey alone.

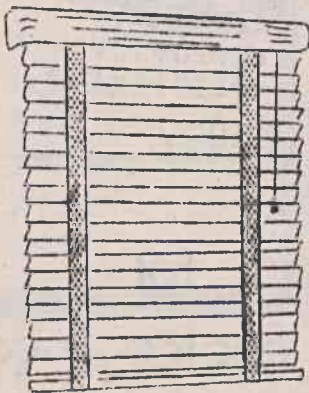

Cathy Stott, 18 year-old daughter of Mr. and Mrs. Fred Stott, was stricken with polio five years ago at the age of 13. Only through the efforts of the MARCH OF DIMES would she have received the treatment she has while she has been at Rex Hospital. Only through the MARCH OF DIMES would there have been the modern methods of treatment that have already been hers. Not only has Cathy been given the needed treatments, but her stay has been a pleasant one according to reports of family and friends.

When Mack Burgess was stricken two years ago, the MARCH OF DIMES took over; and, in a matter of weeks, he was back home.

The above two examples are what the MARCH OF DIMES is for, what it stands for, and what it does.

When some member of the Home Demonstration calls at your door, contribute generously; polio, the dreaded disease, might strike next in your home. If it does, you will have a clear conscience!
