

Workmen Remain To Make Changes

Although the new building is finished, workmen continue to make improvements needed in the auditorium and science laboratory.

The old home economics department is being converted into a science lab-classroom combination. The laboratory will be in the back and the classroom in front.

Until the high school receives an additional teacher, the old science laboratory will be kept in reserve for a classroom.

Additional room to the auditorium is being added by restoring the original balcony that has for years served as the lunchroom.

Another phase of improvement is the installation of speakers to the P. A. system in the new building and agricultural department.

New Yorkers Laud School Equipment; Deplore Ground Conditions

Visitors from New York City here this month couldn't understand how Bailey could have such a "modern, progressive school on the inside and such uncared-for grounds on the outside."

When showed around the school from end to end, Mr. and Mrs. Joe Keisler offered both favorable and unfavorable comment.

The couple was impressed with the progressive methods used and the modern and adequate equipment to work with. They marveled at the lack of evidence of any vandalism.

Both agreed that Bailey's new lunchroom and home ec. department "far surpasses any seen in New York.

As a suggestion to help improve the grounds, the Keislers said, "Train the high school students to set shrubs and sow grass and make it a part of their school work for future home use.

"The school certainly reflects community interest and pride from the inside. Why doesn't it reflect that same interest to anyone who has never seen the inside?" Mrs. Keisler inquired. She wondered aloud why the P. T. A. or some other community organization didn't have ground improvement as its project.

Parents Replace Advisers Attending C.S.P.C.

MRS. CARL H. WALKER and MRS. J. E. FINCH substituted for Bugle advisers, MRS. HOWARD FARMER and MRS. LAURINE T. LASSITER, while they attended, with the journalism class, the three-day COLUMBIA SCHOLASTIC PRESS CONVENTION in New York.

Before leaving, the teachers mapped out a plan for each day's work while they were away.

Displays for the third annual Open House were made in advance by MRS. FARMER and MRS. LASSITER.
