

## Press Institute Not All Work

By P. Liles

Classes and lectures consumed three-fourths of the attention of students attending the NCSPI, last Saturday, in Chapel Hill; while the tour of the campus and classrooms had full devotion of the other fourth.

After classes in Bynum Hall students were well on their way to Gerrard Hall when the University cheerleaders caught their attention by the yells they were practicing for the afternoon football game.

Following lunch in the Carolina Inn, the students decided to really see what the University was like.

The first place they ventured was to the Planetarium to watch the planets revolve around the sun.

To complete their tour, they wandered down to get a view of the library and the number of books within. In the library, special attention was devoted to the N. C. Room with its famous books and importance in North Carolina history.

With new ideas about writing articles and ways to improve the school paper, along with the satisfaction of the University sights, all were ready to head for home.

### BANNER WINNERS

Mrs. Rudolph Glover's second grade and Mrs. L.T. Lassiter's room in high school received the attendance banners at PTA.

## School Provides Various Teaching Aids

Numerous teaching and learning aids, supplied by the school, are available for class work, as revealed by a report formulated by the principal. A copy including each item of equipment has been put in the hands of all teachers.

Many of these aids are for the whole school to use. Others are only for particular subjects.

### FOR ENTIRE SCHOOL

Those that the entire school benefits from are the science kit, film projectors, filmstrip projectors, microscope, globes, paper cutters, record player with approximately 100 records, radio, public address system, scales, maps, first aid supplies, Stereoscope, instructional materials--pens, paper, pencils--and books--text, library, and supplementary.

For particular subjects

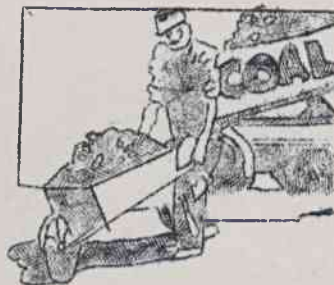

and classes there are the projection microscope, ditto machine, 26 typewriters, two mimeograph machines and two microscopes for commercial and journalism use, printing outfit, three adding machines, Cram's Bookkeeping charts, two tape recorders.

The teachers and students affirm that this type of equipment is a means of "speeding" the learning process.

### H. S. GAINS DICTIONARIES

Nineteen Thorndike-Barnhart dictionaries were added to the school last week as a result of the increased school enrollment.

"The State is using these as they are considered the best right now," reports M. W. Weaver.
