

### Perry Directing Farm Program Over W.N.C.T

Bobby Perry, a graduate of Bailey High School, class of '48, is now conducting a television program entitled "Farm Facts" over station WNTC in Greenville five evenings a week from 6:45--7:00 to enlighten farmers in the latest techniques in farming.

Working with the State Extension Service and county agents, he prepares his program for each evening. The program is supported by 18 counties.

After graduation from Bailey High, Perry attended State College, where he majored in vocational agriculture.

### Citizenship Doctrine Promotes Project

Mrs. R. G. L. Edwards affirms that she agreed for her grade to operate the popcorn machine in order to teach "her boys citizenship principles: honesty, pride, and responsibility."

The boys operating the machine are David Burnette, J. W. Carrol, and A. J. Brantley, all from the eighth grade. These boys also take the job of managing the machine at all ballgames and carnivals.

In appreciation of the boys' work done during the year, Principal Weaver gives a small remunerative award at the end of the year.
