

Students Experience New Learning Situation

Serving as a climax to four semesters of typing, students in typing II will do Office Practice typing this semester, says their instructor.

This project consisting of a series of 40 practical jobs may be done on the typewriter. The jobs represent, as nearly as can be determined, a rather complete selection of the typewriter jobs that are most commonly performed by secretaries, stenographers, typists, and other office workers.

REAL SITUATIONS

The jobs themselves, are for the most part "very real." The forms are all exact replicas of forms used in a large and well-known company. Much of the data on these forms and many of the letters have been drawn from the files of the company.

In short, everything possible has been done to make the jobs exactly like the work done in offices.

CLASSWORK

The civics students have studied the Constitution and learned the Preamble. Following this, Westall plans a unit on the United Nations.
