

## School And Town Can Win Through Cooperation

As has been reported in this Bugle edition, school and community projects for the Finer Carolina Program are well under way.

If plans are carried out, there should be not only a change in the appearance of the town but a feeling of pride and achievement by those who work to reach the goals. This is the feeling often resulting from group cooperation.

And what about school improvements? The work of the seniors, the talked-of paved area, offering students a recreation area for skating, basketball, and other sports, and the possible resulting grass covered front yard should certainly improve the appearance of the school and develop school pride.

With everybody pulling together—students, faculty, parents, town people—there is no reason why Bailey will not become a finer town whether it wins a thousand dollars or not.

## How To Solve The Study Problem

All work and no play may make Jack a dull boy, as the article on page 1 relates, but all play and no work will definitely not make him a bright one. Apparently, though, many B.H.S. students assume that an education can be obtained through play.

They are mistaken.

Former students have been heard, many times, expressing their regrets at not having studied harder in school. Why wait until it is too late?

The student who doesn't plan to attend college should be interested in absorbing every particle of high school knowledge possible; if anything, this student should be more interested than the one who plans to further his education.

"Cramming" for examinations is nearly a complete waste of time, because one seldom retains, for any length of time, material memorized just for a day.

How to inspire students to study has been a problem of teachers' for many years. Perhaps when students will spend as much time doing honest studying as they do making excuses or trying to get out of homework, the problem will be solved.
