

### Bugle Widely Known

Going to former BHS students in California, Kansas, and Virginia, the BUGLE keeps pace with its former circulation area.

A total of 260 copies of the BUGLE are published monthly by the journalism class. Of this number, approximately 185 go to students; 25 go to advertisers; 20 go to journalism students for correction and for study for possible improvements in the next edition.

The BUGLE is on the exchange list of ten schools, two of which, publishing papers for the first time this year, made a special request for the BUGLE as a guide.

### Accident Rate Rises

Accident rate this year, according to Principal Weaver, "is well on its way toward surpassing last year's record."

That record for Bailey was three times higher than the county average.

Already, during this school year, there have been 27 claims filed, ranging from \$10 to \$110. The total amount paid out by Pilot Life Insurance Co. to meet these claims has been \$456.50. Average amount for each of the 27 students was \$16.87.

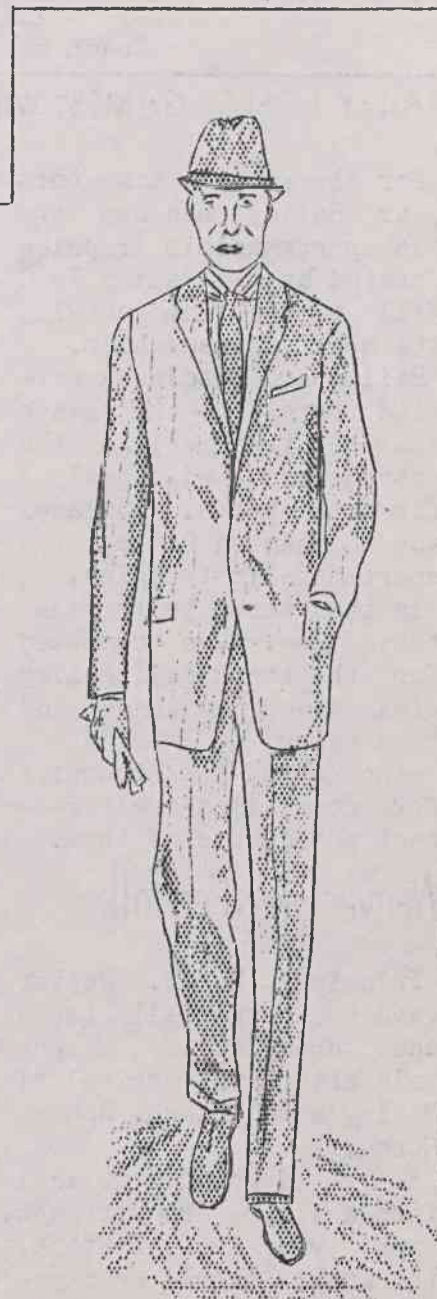

## Board Members View Legislative Program

To become acquainted with the schools' legislative program was the purpose of the District School Board meeting earlier this month. Principal M. W. Weaver attended the morning session.

This program, presented to the Legislature by the State Board of Education, is asking for an increase in appropriations of 18 cents per child per day for 180 days.

As a result of this in-

crease, the Board points out that each school-age child could receive better books, better learning conditions, better teaching facilities, better transportation to and from school, better vocational, and health courses.
