

THE FIFTH GRADE

Our Classmates

We have the same teacher we had last year, but we have many new classmates, most of them come from Scaly. Our new classmates are: Grace Allen, Eula Allen, Wilma Bryson, Doris Mason, Mae Miller, Frances Miller, Louise Owens, Regina Burnette, Gladys Neely, Lois Bryson, Frank Houston, Jessie Vinson. We have forty-three in our room.

-Lena Crane

Coming to Highlands to School

I went to school at Scaly last year. I like school at Highlands though it is different. Here we have a teacher for each grade. We also have motion picture shows. Some of us had never seen a motion picture until this year. We like to ride the bus. I like my teacher too. She is kind to us. I like the games we play. My teacher plays with us. If I always like to come as well as I do now, I will finish high school here.

-Regina Burnette

Making Ships

The Fifth Grade made some ships for reading. The teacher said that Ligon Creswell's was the best one made. He put his together with clips and stiff cardboard. He made the Mayflower. We are studying about it in history. Garnell Owens had a good one also. We have them on the sand table now. Some of the sails would not stay on. We had to paste them on.

-Evelyn Phillips

My Vacation

Throughout my vacation this summer I made a garden. I had some flowers which were very pretty. I worked in the field some of the time. I am glad I can come to

Highlands to school this year. I went to Clear Creek last year.

-Gladys Neely

THE FOURTH GRADE

Fourth Grade Geography

We are proud of our geography in the Fourth Grade. We are studying about the Tigris and the Euphrates rivers. We pretended that we came up the rivers in a steam boat. When we reached the desert we went with some men and their camels. We called that a caravan. The men carried sugar, coffee, dates, and figs for food. Houses are built of sundried bricks and have flat roofs. This is because they have little rain fall. Flocks of sheep and goats live in the land between the rivers. The flocks are taken from place to place to find food. Little girls and boys help in this work.

-Anne Anderson

THE SECOND GRADE

There are forty-five pupils in the Second Grade. At first we had only thirty-eight pupils. We have seven new pupils. We have had four visitors. Their names are Vivian Rogers, Yvonne Monteith, Jane Anderson, and Alvin Crowe. We were glad to have our visitors.
