THE KIND OF
STATISTIC
WE LIKE TO
BRAG ABOUT.**

When Karen was 18 years old, her doctor discovered she had a deadly form of leukemia. Facing incredible odds, Karen spent three years in intensive chemotherapy.

Now, eight years and two sons later, you'd never suspect that she had battled a disease that kills more than 15,000 Americans every year.

Your donations help us continue the programs that will give us more statistics like Karen Anderson. Statistics we can all be proud of.
