

CIVIL PREPAREDNESS

HURRICANE PROCEDURES FOR THE PINE KNOLL SHORES GENERAL PUBLIC

A general public meeting has been designated for June 6, 1988, at 10:00 a.m. in the Town Hall. Residents of Pine Knoll shores are URGED to attend.

Hurricanes are the greatest storms on earth. June through November is the designated hurricane season. Residents of Pine Knoll Shores should be aware of this destructive force and BE PREPARED.

The primary purpose of this meeting is to inform the general public what they should know before - during - and after the HURRICANE.

Please remember - knowing what you are doing could save a life.

JOE HENYECZ

DOGWOOD CIRCLE PLANTINGS

The decorative plantings at the east entrance to Dogwood Circle are complete and many people have remarked about how very attractive they are. Shore Line decided to find out all about how they came into being.

The Pine Knoll Association owns that property and Ed Moeller, Director, decided it should be fixed up. He designed the plantings, presented the project to the PKA Board which board enthusiastically approved the expenditure.

And so we talked to Ed about it. He said the project took about two weeks in all to complete. The Community Appearance Commission had to recommend it before the Town could issue a permit and the PKA architectural control committee also had to approve it.

Once the approvals were obtained it was time to find the workers. That was the easiest part, Ed says. As a matter of fact people came up to him asking to be able to do something! The space had to be cleared of weeds, the decorative fence installed, and the area graded. It took a day to put the fences up, two days to do the actual planting.

We can't resist naming the names of such a dedicated bunch. We start with Robert Youngblood who donated the soil. After that it was: Luke Hargroves, Clyde Lynn, Ed Olson, Max Hileman, Ken Doremus, Fred Randle, Betty Condra, Maxine Moeller, Lois Jean O'Keefe, Dick Perkins, Ken Brendstrup, Bill VonThaden, Russ Beard, Jack Millis, and Bob Hudak putting in the hard work.

This is a project of the Property Owners Association which owns that property and maintains the ocean front park but it benefits all of us. We are grateful to the Association and look forward to further projects which Ed tells us are in the works.

FROM THE HISTORY

In the story last month about the Town History we covered the difficulties in securing the charter. Does that mean all the creative work was now complete? Of course not! Now it was time to create a town, and how this was done is told in the chapter entitled: "The Formative Years, 1973-1975", the 6th chapter of Ken Haller's "Town of Pine Knoll Shores, 1973-1985".

Here we have a group of people dedicated to the successful formation of the town but with very little experience in local government to work with. The Roosevelts provided some help. They had established covenants for the Pine Knoll Association which could be used as a model for some aspects of the Municipal Code formation. They also presented a gift of \$20,000 to be used to finance operations until revenues could be collected, and 24 acres to be used for the town hall.
