The "I" In Accident; Injury Means Most To The One Who Gets Hurt

When a serious accident occurs there is always excitement and confusion around the particular spot where it happened. But it is soon a thing of the past and everyone goes on with his or her job. In a little while it is almost forgotten.

However, there is one who does not go on with his work—there is one who is going to remember the accident for a long time to come. He is the one who was hurt, the one who is suffering the pain and the upset which the accident has caused.

the other fellow to be careful. But it is just human nature not to want to connect that "I" in accident with our own personal carelessness.

When an accident happens, it is one second too late to be careful. One sec-

ond before is the time to remember that you could be the "I" in Acc-I-dent!
