Visit Mexico

Mr. and Mrs. Taylor drove to Texas on a vacation trip. Before his departure Mr. Taylor was given a briefing (in fun) by George Brandon, cotton classer at Fieldcrest who has visited the area several times in connection with the purchase of cotton for the mills.

Use Four Rules To Lift Objects Safely

Do you follow these four simple rules before you make a lift?

1. Before starting to lift, make sure that the hands and the object to be lifted are free from grease and other slippery substances.

2. When lifting an object from the floor or ground, plant your feet firmly, and not too far apart, on a level non-slippery surface; bend your knees, keep your arms and back as straight as practicable, and get a good handhold on the object.

Then lift steadily and smoothly, WITHOUT JERKING, making the powerful leg muscles do as much of the work as possible.

3. Before lifting an object from a bench, shelf, or other elevated support, move it as close to the body as possible, keep your back straight, and lift with your legs.

4. Crouch or stand in a position with relation to the object to be lifted so that the weight will be distributed equally.

Never lift while in an unbalanced position.

There's no profit in accidents. Figure what an injury could mean to you and play it safe. Meet your full responsibility—to yourself and your family.
