

Lance Solaroli, design supervisor at Karastan, describes to Florida State visitors how setters read a design for an Oriental design rug.

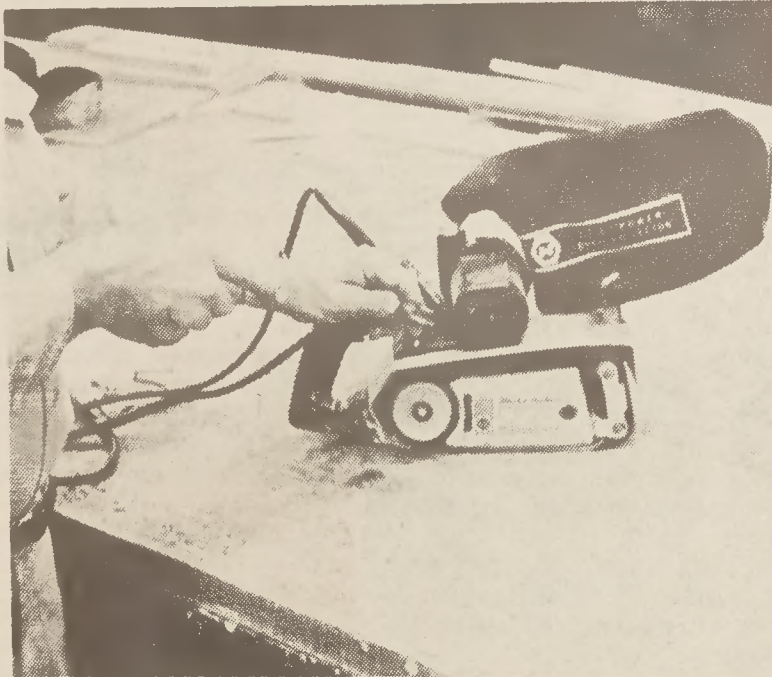

Students were particularly interested in designing process, observe Carnell Hall, designer, as she works on design for a rug.

Florida Group Visits Karastan

A group of graduate students in interior design from Florida State University toured the Karastan Rug Mill on Monday, April 21, to observe the steps in the manufacture of Karastan rugs and carpets from their design all the way to the finished product.

Savannah H. Day, associate professor of housing-interior design, made the arrangements for the field trip for the students and accompanied them to Eden.

The students were particularly interested in the Design Department and spent much of their time there.

A three-pronged plug like this one provides a ground for a portable hand tool if the receptacle in which the plug is inserted is properly grounded.

Electrical Hazards Are Safety Topic For May

The Fieldcrest safety topic for the month of May will be "Common Electrical Hazards." Meetings will be held in all plant locations throughout the month for discussion on how to avoid accidents on the job which result from electrical hazards.

Some of the common electrical hazards which most often are the cause of accidents are:

1. Frayed electrical cords.
2. Using improperly grounded electrical tools in water or dampness.
3. Overloading of circuits.
4. Using non-grounded cords (two-prong).
5. Improper wiring.
6. Damaged receptacles and/or damaged plugs and sockets.
7. Overloaded motors.
8. Improperly lubricated motors.
9. Unguarded light bulbs.

Safety is everyone's job. Employees are urged to watch for these hazardous situations and report them to the supervisor.

Meet the Supervisors

Tommy P. Jefferson is superintendent of woolen system yarn manufacturing at the Blanket Greige Mill. He has been with the company for 14 years and started as a utility hand in the Wool Carding Department.

He was a clerk and a lot man in the Wool Picking Department before entering the supervisory training program. He was appointed shift foreman in the Cotton Carding Department in 1964 and in 1969 moved up to foreman of the Cotton Carding and Spinning Departments.

He became superintendent of cotton system yarn manufacturing and yarn preparation in 1972 and in December 1974 was appointed to his present position in the Woolen System Yarn Manufacturing Department.

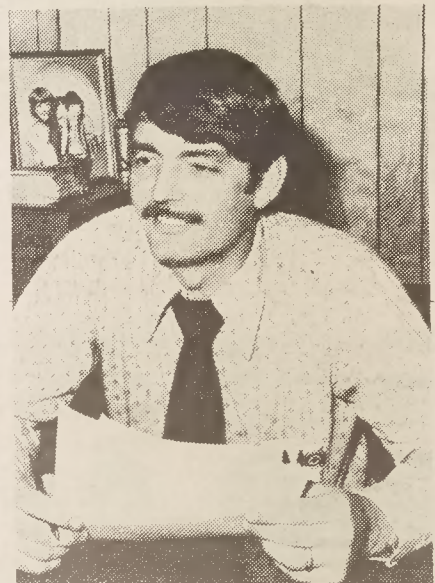

Mr. Jefferson is a captain in the North Carolina National Guard and is commanding officer of Battery C, 5th Battalion, 113th Artillery. He has

Profits Needed

If you're like most people, you'd snap up a job with the company making a profit. You'd figure on steady work with that company, better paychecks, and a chance to move ahead with a progressive, competitive firm.

Profits are needed to do all these things — and more. Profits make it possible to pay dividends to shareholders, turn out better products more efficiently, take part in worthwhile community activities. Most important, profits help provide steady jobs and wages.

Profits make all these things possible. Let's do all we can to make profits possible.

TOMMY P. JEFFERSON

Wins 1st

Danny Moretz, place winner in second-place jump at the Sp... held recently.

He is the son of Charles Moretz. (Estelle) is em... Yarn Preparation at the Blanket G... Danny will be... May 8.
