Montreat Breaking News:

On the night of Wednesday, January 23, high speed winds reaching terminal velocity, the very same that knocked out the power, ripped a Montreat landmark tree out of the ground and into the Gaither practice rooms. Davis resident director Jim Dahlin comments; "I'm now in the 'People Who Have Seen and Heard a Transformer Blow Up Outside Their Window' Club. Hopefully the annual dues take into account the 3 hours of sleep I lost."

On January 18, Montreat was predicted a 100% chance of snow.
.....No snow was recieved.

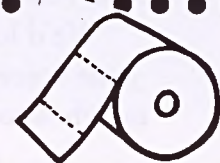

An electric car has been spotted charging in the designated charging station outside of Belk.

VERSE
of the **WEEK**

When troubles come your way, consider it an opportunity for great JOY.
