In the 1960s teenyboppers sighed as they watched this darkly handsome actor on one of the top-rated TV shows of the decade. After years of obscurity he emerged, heavyset and bald, to star in one of the top-rated shows of the 80s. Name him.

NEXT WEEK'S HOROSCOPE BY SALOME

The well-balanced Libra might find this week a challenge. Some Librans include actor George C. Scott, actress June Allyson and rock star Bruce Springsteen.

Aries Mar. 21 - Apr. 19 **Mars**
Time to reexamine your goals. This week Arian Rams or Ewes can find the reasons why some of their best-laid plans came unravelled. Think twice about the efforts of a romantic Libra to communicate.

Taurus Apr. 20 - May 20 **Venus**
Venus is strong in your star line this week so if you feel a compulsion to communicate on a romantic level, give in and give (and get) some loving. In business, Venus will just love to help you make the right moves.

Gemini May 21 - June 20 **Mercury**
Impatience marks your reaction to some news about a new opportunity. Take the necessary time to better prepare yourself. Contact will be made with an old friend who has been thinking of you.

Cancer June 21 - July 22 **Moon**
Put together your impressions of that recent trip. There's an opportunity lurking in there that you may have overlooked. Did anyone tell you about a new job or a new business bid or about a new romance?

Leo July 23 - Aug. 22 **Sun**
When the weather gets cooler, Leos and Leonas start to warm up to indoor activities. Spend more time reassessing business commitments. Some old accounts may be of no-account worth. Be positive.

Virgo Aug. 23 - Sept. 22 **Mercury**
A restless week for Virgans. But it's one in which you can really put that extra energy to work for you again. Enjoy leisure activities without feeling guilty. Your work will benefit from a more relaxed approach.

Libra Sept. 23 - Oct. 22 **Venus**
A real challenge comes along. Think all your potential replies through first. You may be surprised to learn that you're well prepared for the surprise offer that comes along. Be more positive about the future.

Scorpio Oct. 23 - Nov. 21 **Pluto**
You strong, silent types may find it difficult to resist some tempting offers coming your way. Sift through them to find the one that suits you best. Don't be surprised when an old friend returns.

Sagittarius Nov. 22 - Dec. 21 **Jupiter**
Travel plans are in your near future. Check the area that holds the best opportunity. Combine vacation with scouting activities. Then if you decide to relocate, you'll know why later on.

Capricorn Dec. 22 - Jan. 19 **Saturn**
You're feeling as if you want a quick answer to a recent request but resist the temptation to call for one. Your request is being considered on its merits. Meanwhile, prepare to meet a new friend at a party.

Aquarius Jan. 20 - Feb. 18 **Uranus**
You're feeling rather cheerful this week. To keep that feeling, take advantage of friendly overtures. Although you're shy, make an attempt not to shy away from sincere, well-meaning people. Develop relationships.

Pisces Feb. 19 - Mar. 20 **Neptune**
A recent personal triumph can be invested so that you may continue to reap rewards. You might consider revising your resume to include your success on a new one and send it out to potential employers.
