### ALL FIGURED OUT

LIEUT. UPTON SHOWS WHY BASE HOSPITAL NO. 45 IS INVINCABLE.

Lieutenant George Upton is just the man for detachment commander for Base Hospital No. 45. He actually believes that organization of willing workers has never had a peer in American military annals. He has figured it all out from initial letters and numerals and has arrived at the conclusion which he voices in verse.

Best  
Always  
So  
Each  
Have  
Optimism  
Such  
Prospects  
Indicate  
That  
All-powerful  
Love for right  
And he has it figured out from another angle—  
A—1———A1  
B—2———B—2  
C—3———C—3  
D—4———D—4  
E—5———

The fifth letter of the alphabet is E and the fourth letter is D. The initials E and D stands for Excellent Detachment which means success and which signifies a part of the ways and means to the complete annihilation of Kaiserism and everything appertaining there-onto.

### FIFTY-FOUR.

Coming events are casting their shadows before—

And of such constitutes dear old fifty-four.

Old Glory will over her soar and soar.

And at the sound of the cannon roar  
All of our boys at the tremulo of the dunker din

For we are just bound to win—  
Over the top we will be there with the punch

For each and every one of us have just got the hunch

For with the spirit of dear old Fifty-four

The enemy before us will prostrate fall

And the allied flag will be something to adore

And when upon the arrival of posterity—

And in after years  
We all of us can look back to our careers—

And say in reverse and pride  
With dear old 54 by our side—  
With supreme satisfaction and bliss  
The dear old flag we with ecstasy and honor kiss—

Saying to our children just see  
What you all have miss(ed)

For at Camp Greene we originated and for a time hibernated

But the final result will be the same—

And the Boche's will think us far from tame

We do not aim to either come or remain

### HOW TO BE A WARDMASTER.

The first thing to do after you've received your wardmaster's commission is to lift your head in the air, throw your shoulders back and make people think you can be the whole works when you want to.

Always be on duty at 6:45 every morning so the night man and nurse can inform you whether they succeeded in passing the night without your assistance.

When the day orderlies come always say, "Good morning," and at the same time hand them a broom or a bar of soap for likely they've forgotten over night just what they've been doing in wards for the past eight months and of course they will be very grateful to you for reminding them of their duties each morning, and after a while they will show their appreciation by inviting you out to see the beautiful flowers and birds in some nearby wood. Always thank them for the invitation but never under any circumstances accept it for it is very unmilitary if you are a private, first-class, to be seen going around with a private and besides your services would be missed greatly by the surgeons, nurses, and other orderlies and its your patriotic duty to be around the ward both day and night, if you can, for the surgeon often runs upon some big terms pertaining to the science of surgery and your valuable services will be required to help him out.

To show his appreciation for having such a smart fellow around he's likely to send you away on an errand which will keep you away from the ward for an hour or two. But don't let him slip anything over you. If he seems awful anxious for you to go away from the ward just send an orderly on the errand and hang around the office and ask him all kinds of questions concerning the weather, the movement of American troops to France and ascertain whether he had any veterinary practice before he decided to be a surgeon.

When the O. D. comes around tell him you're thinking about having a crab and cracker party in your ward some evening and his presence would be greatly appreciated. He will immediately think you're a real sport and take you down to the adjutant who will try to see if he can't get you a job where the chances of advancement are not quite so rapid.

—By Private Robert Nikrant.

But our work is God's work in the main

And to do this work truth is always right and sane

Old Glory and Democracy will rise up and never will be on the wane.

Our sons and their sons will find 54 as a memory of tact, facts and achievements.

Many will be the Kaiser's bereavements.

When old 54 comes knocking at the door.

By LIEUT. GEORGE UPTON.
