

WHY THE WASTE.

I have wondered why some military use cannot be made of the old Queen's college building, which stands deserted and darkened on College street.

The building could be well adapted to hospital use. It would have been a most valuable asset last winter when fuel was scarce and the wind howled around the frame sheds of the camp Greene base hospital.

The old Queens college building, which should hold at least 400 patients if converted into an army hospital, is steam heated and being builded of brick could save fuel and be a most snug structure for caring for the sick.

Rather than being allowed to stand in idleness and to fall to decay from discuss it seems that in this hour of need immediate arrangements should be made for offering the big building to the government for the care of the sick.

"LOOSEN UP"

To the Public Forum Editor—

Don't wait to be asked for the Fourth Liberty Loan—offer to do your share in the Loan.

"What are you going to do for Uncle Sammy" was sung everywhere last winter. Answer that by digging deeper than ever and give, Give GIVE—till Uncle Sam cries "Enough".

Everyone knows that all kinds of seeds are planted and as they grow the soil above them loosens and the little shoots come forth and later wonders take place. Let the American people resemble the soil, with which God has accomplished so much. Let us loosen and produce such a crop at this Fourth Liberty Loan that our children and children's children will say "Oh if we could have lived at that time!"

Sacrifice? Think of the sacrifices in Europe. Shall we let the Kaiser say America has money but is tight fist? No! A thousand times no! Loosen up and do it today!

NEW ASSISTANT.

The official force of the American Red Cross, at Camp Greene, has been increased by the arrival of Mr. Alexander Johnson, of Fort Wayne, Indiana. Mr. Johnson, who has been here since Friday, will have the title of associate field director. While he has not been affiliated with the Red Cross until recently he has been a social worker in the Middle West for nearly forty years and is considered to be thoroughly competent to carry on the work at Camp Greene.

THE FLU-FLU BLUES

Here and there and everywhere,
The boys are having an awful scare.
Of recent mornings at Reveille,
We feel as the 'we're sick at sea,
And wonder what it's all about,
Why we're all so down and out,
They say for sure we've got the grip,
We begin to figure—on a little trip.
Oh, it's awful, awful, awful news,
To find we've got—the Flu-Flu Blues.

The Top, he gets hardboiled,
And thinks of how he's toiled,
To keep things clean and sanitary,
Around the Company planetary.
Calls Attention and then says Rest,
Before the men have completely mess-

ed;
Warns the fellow who will not shout,
When he's feeling all down and out,
That a little preventions' worth a
pound of cure,
And he'll have to scrap or else make
sure,

To report the facts and tell the news,
When he finds he's got—the Flu-Flu
Blues.
