Two pay-days a month don't go bad, do they Barth?

AWFUL GLEANINGS

GATHERED OR MADE UP BY
IVAN H. LAW.

Do you hear the guns resounding
Far across the big salt pond?
If you hear them loosen up
And buy another bond.

The boys "over there" consider the man who does not buy another bond in the same class with the man who makes defective ammunition for them.

"Bulgar King Abdicates, Son in Power" says a headline. What do you mean "in power?"

A lot of our new recruits with a natural tendency to cold feet and spiritual agony seem glad to camouflage their anaemic disabilities under the fashionable subterfuge called Spanish influenza.

Remember that the Liberty Loan drive affords the greatest school in salesmanship ever offered to the public.

Of course we can help the Kaiser. Why not? Let us all get together and buy bonds. It will help him realize his mistake.

No wonder the Gillespie plant blew up. If I remember correctly it was situated on the Cheesecake Creek.

American prisoners are said to "kid" their captors. Kind of a waste of energy those Germans to laugh just at present.

We note that the German emperor tells the people that "the navy is holding its own against the united enemy naval forces? Yes, we admit that the anchor lines are holding out very well. Remember that every dollar you invest in Liberty bonds will buy military mileage from Metz to Berlin.

We note that some of the boys who are not going overseas are acquiring oversers among the Dixie maidens.

SURE.

Darkey to Ward Orderly—"Where do I wash here boss?"

Orderly—"Wherever you are dirty, Rastus."
