## NOBODY LOVES A NAGGER

There's something radically wrong with the person who finds fault all the time.

There are several things that would cause a person to be a perpetual nagger. They could be home conditions. This could be helped by cooperation of the person's teacher. A teacher can help a student many times if he would but stop to help him.

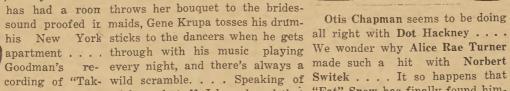

Helpful criticism is just as necessary as helpful praise -but no more so. This is something very seldom seen in a class room. If more of the pupils would be cooperative to-SIDELINE HIGHLIGHTS ward such naggers, there would be fewer.

Students, when you see someone in a blue mood, try kind words. This will do a lot of good toward decreasing the percentage of naggers in our midst. T. H.
