PANTHERS MAKE FIVE STRAIGHTS

With the same "Blitzkrieg" like force which is evidence of court supremacy and victory, the "Panther juggernaut" still hold it's unblemished record. It started the attack before Christmas with a fifty-seven to thirty-five victory over Hawkins High School of Warrenton on the home court. Then beginning the New Year right, the "Panthers" journeyed to Warrenton and again overpowered the "Blue and White" fifty to nineteen. Returning Home, the "Panthers" played host to "Mary Potter Academy", and annihilated them by the score of fifty four to fifteen. Then the "Panther" quintet, with a large student body following, journeyed to Oxford. There they reached the "zenith" of their scoring power this year, by blasting into oblivion the "Rams" five, by score of sixty-seven to twenty-six. Highlights of the game were the speed and coolness of the "Panthers", and the accurate shooting of R. Hill who made twenty-six points. On Monday Night, the "Panthers" were invaded by the "Army Training Center from Camp Butner". Playing before a capacity crowd, the "Panthers" were slow to get started and at the half led by the score of thirteen to four. They came back in the second half after having been "Spark-ed" by the gallant playing of G. Harmon and W. T. Davis in the first half, with deadly accurate passing of "Red" Moore and "Chuck" Epps coupled to the devastating shooting of "Duke" Harmon, "Rip" Hill, and Jack Thrower. The "Panthers" left no doubt in the minds of the spectators as to the outcome of the game. The soldiers put on a show near the end of the fourth quarter, but it was of little avail, as "Henderson" easily remained undefeated, winning forty two to twenty-four. High scorers were R. Hill and D. Harmon, with fourteen points each; H. Wilson, formerly of Virginia State College, was runnerup with twelve points for the soldiers. This failure to score fifty-five points, dropped the "Panthers" average per game to fifty-four points, having scored two hundred and seventy points against one hundred and nineteen points for their opponents in five games. Other foes to meet in the future will be BOOKER T. WASHINGTON OF NORFOLK, BOOKER T. WASHINGTON OF ROCKY MOUNT, CAMP PICKETT AND OXFORD FACULTY.

A deodorant is a substance intended to counter-act or take away odors.

Many persons troubled by perspirations odors use deodorant and there is no objection to reasonable use of satisfactory ones. If they do not affect the skin or clothing, if too strong, they irritate the skin.

Persons who have thin and tender skin should be careful in selecting cosmetics for some preparations contain chemicals that are very irritating to the skin.

The best security of healthy skin is to observe and carry out healthy habits. Above all keep the skin clean.

HEALTHY LIVING

Lewis Greene

The skin as you know is outside covering of the body. It is one of the very important organs of the body. It is one of the organs that has a great deal of work to do, besides contributing to ones personal appearance.

The inner part of the skin, with its areas of fat, act as a buffer, against blows, somewhat as a bumper does on an automobile. The outer layer of the skin serves a special protective purpose. This skin contains nerve ending for different kind of sensations.

Perspiration or sweat is a secretion that is made in glands of the skin. It is constantly coming to the outer surface of the skin and evaporates, though we may not feel any moisture on the skin.

Some people have thin tender skin; others have tough skin. Most of us have skin that would be classified between those two extremes. The condition of ones skin should be considered in selecting soap for personal use.

Much of the waste matter that comes out through the skin, aside from water, is in the form of fatty material. Soap helps to remove this waste material.

HOW TO MAKE FRIENDS

"If you would have friends, you must show yourself friendly". Very few people are able to resist the steady shine of friendliness. By and by they will unbend and like you. If they do not, you have not lost any thing and the effect you have put forth has done you good. If anyone you have to do business with is grumpy, fault-finding, jealous, suspicious or sarcastic, do not let that person induce you to imitate him.

THE SKIN AND HOW TO CARE FOR IT--Lewis Greene

A good soap should be well made from clean fresh fats; should be free from an excess of alkeline or coconut oil, not adulterated with rosen and should lather freely. It is wise to avoid medicated soap, cheap common soaps and freak soap.
