

## WHO ARE THESE PEOPLE?

They are visitors to our plant; but not ordinary visitors. They are students and graduate x-ray technicians from North Carolina hospitals. Technical Representatives from our Marketing Department brought these customers and potential customers to see our plant and witness the complex manufacturing steps required to produce a superior quality medical x-ray film.

Their tours included a visit to the Casting, Coating, and Finishing Areas. Then a tour of the Control Laboratory and our x-ray facilities brought them to more familiar territory.

Whenever time permitted, the tours included a trip to one of the waterfalls on the plant property. Our guests were from the Piedmont, and found the scenery as exciting and interesting as the process.

X-ray technicians from Forsythe Memorial Hospital in Winston-Salem scrutinize the banks of gauges and controls in the Casting Area where the "Cronar" film base is produced. They are: (l. to r.) Judy Byrd, Rita Hartman, Judy Collins, Ellen Harrell, Mary Ellen Robertson, Jen McBrayer, Dianne Hoots, Diana Almond and Susan Rice.

Forsythe Memorial Hospital technicians inspect the "Thrift-Paks" of film in Unreleased Finished Product Area.

The senior class of x-ray technicians from U. N. C. Memorial Hospital in Chapel Hill, N. C. in the woods on the Du Pont property: (left-to-right) Karen Tucker, Becky Watson, Cy Whaley, Jan Biggs, Arlene Caughron, Dan Lutz (seated), Diane Halprin, Dianne Blackwell, Kitty Burwell and Elaine Brown.

Braving the slippery, ice-covered rocks below High Falls: Arlene Caughron and Cy Whaley.

U. N. C. technicians in warehouse. Graham Grant was a willing guide.
