PLANT UNITED FUND DRIVE

"Thanks to you, it's working" is the theme of the 1972-73 United Fund campaign lasting from October 9th to the 19th. This year's goal is \$21,500.

Plant employees contributed a total of \$20,744 (separate from the \$4,000 corporate gift) last year. The increase in our goal this year reflects in part a 9.4% increase in the budgets of Transylvania and Henderson counties.

Transylvania, Henderson, and Buncombe county agencies are included in this year's distribution in proportion to Plant population living in these counties.

Solicitors from all areas will give every plant employee an opportunity during the Plant campaign to review the needs of the many worthy community agencies included in the budgets and make their contribution to help fulfill these needs.

Comments By United Fund Solicitors

The following comments were made by three of the sixty 1972 UF solicitors: BEVERLY WHITMIRE — Accounting Solicitor "I believe the United Fund is beneficial to the community. Most of the agencies helped through the United Fund are essential to the growth and health of the community. For example, the Boy and Girl Scouts are really needed for the young

people. The Rescue Squads are very essential. Elderly people have been helped many times by rush trips to the hospital for such things as heart attacks. If people are really interested in helping their fellow man, this is one way of expressing it."

JOHN FISHER — General Maintenance Solicitor "If I didn't believe in the United Fund, I couldn't and wouldn't be a solicitor. I've solicited before and run into problems which sometimes are legitimate. Overall though, I think the United Fund has it's advantages. I believe if people will weigh these advantages against any disadvantages, the advantages will come out on top. The different agencies supported by the United Fund may not all be to your liking but some are. We should give to support the ones we like and not refuse to give because there are some we don't like."

Jack and United Fund

October 9, 1972

Fellow Employees,

The Brevard Plant has begun its annual United Fund campaign to raise funds to support community service and charitable organizations for the year 1973. The plant will donate to the Transylvania, Henderson, and Buncombe County funds and it will cooperate by making time available for the administration and solicitation of the campaign.

The sustaining idea of the United Fund is to combine the needs of many organizations into one drive. This reduces the number of contacts during the year to support individual agencies. We who enjoy good health and have a good job share in an obligation to assist those who are less fortunate, provide wholesome activities for our youth, and support other agencies which contribute to the betterment of our community.

One of your fellow employees will contact you personally for a contribution and to explain the different ways in which you may make your contribution. While only you can decide whether or not to give, and how much you can afford, it is my hope that all employees will accept this civic responsibility and will generously support these worthwhile community projects.

Jack C. Dense
