Sroog Crashes In Night Flight

Ms. Katherine Sroog, a Grimsley High English teacher, crashed during the test flight of her super-sonic zoom broom at midnight, upon colliding with the Great Pumpkin.

The Great Pumpkin, who had been out for a leisurely stroll, tried in vain to jump from the path of the oncoming broom. The head on crash sent the Great Pumpkin spinning toward a lamp post, which he hit and ricocheted off of, only to smash into the ground at 75 m.p.h. breaking into several pieces.

Ms. Sroog ditched when her test broom hit the Great Pumpkin, and remained unhurt, but her super-sonic zoom broom, now out of control, continued on a path of destruction.

A sonic boom shattered the windows at the vocational building, as the zoom broom broke the sound barrier. The broom flew into the main building, wreaking havoc wherever it went. After plowing through the ceiling to the second floor, it then proceeded to the bus

parking lot, where it skipped from roof to roof of the school buses. Finally, after setting fire to some nearby trees, the super-sonic zoom broom came to a rest on top of the breezeway between the main building and the vocational building.

Speculations as to what caused Ms. Sroog to crash were varied. While some blamed the problem on a malfunction within the broom itself, others believed her to have had too much of her home-made brew.

According to Virgil Howard, who witnessed the accident, "It wuz a mess. Pumpkin flew everwhichaways. The driver of the broom bailed out, but her parachute didn't help her nohow ... it opened on impact."

Ms. Sroog's flight insurance will pay for the broken windows, burnt walls in the main building, and the demolished school buses.

Ms. Sroog had been on her way to a WITCH'S (Witch's Independent Triad Confederation for Hexing Students) meeting when the mishap occurred.

Has the firing squad been practicing or will the girl survive...stay tuned ...

Skippers Under Fire

The Attendance policy at the Greensboro public schools has been in effect since August, 1976. The school board has finally decided to let the students really know what happens after eleven absences.

When the eleventh absence has been committed by a student they receive a yellow slip from Mr. Glenn. The student is then to report to his office immediately. If the student does not report immediately a group of bloodhounds will track the student down. The student is then put in chains and dragged to the office.

After a few minutes of questioning the student Mr. Glenn brings in a jury. The jury consisting of Mr. Jones and Mr. Gulla. They decide if the student is guilty of deserves a waiver. This takes much time, approximately two minutes. After the verdict, which is always guilty, a punishment is then decided on.

The traditional punishment at Grimsley was decided on by an ROTC committee. The punishment is death by a firing squad. Black roses are sent afterwards to the parents, C.O.D.

The school board reports that

the student body has declined by 39% in the past two months. This fact has distressed the administration greatly so they are now attempting to come up with a new punishment. Tentatively saying "Rubberbabybuggybumpers" 28,987 times will replace the ROTC treatment. Other suggestions for penitence include the placement of pop-sickle sticks under the fingernails of victims and requiring the unlucky student to dine in the elegance of the Grimsley cafeteria for two weeks.

So remember all you GHS people we can get you now, or get you later.

Sroog crashes: too much brew?

Sasquatch Spotted?

by Don Juan

Could there be a "Baby Sasquatch" hiding here around Grimsley? This year I have seen many strange things here but none was more strange than this ape-like thing I saw trotting through the wooded area near the Old and New Science Buildings. At first I thought my eyes were playing tricks on me, then I saw the same thing on numerous other occasions. A few times I tried to follow it without success.

After failing to follow this creature I decided to find out if anybody else had seen it. After talking to hundreds of bystanders and students, there was a breakthrough. It seems there have been many sightings of this creature. The amazing thing about "Baby Sasquatch" is that these sightings are in contradiction to that of other sightings not in this area. It's much smaller, about five feet 8 and a lot lighter

at about 170 lbs. But besides that, the half-man, half-ape, slumped over body description, fits previous descriptions.

Here I have some eye-witness accounts of these strange sightings. The names of these informants have been held because of various reasons. The first one said -- "If anyone told me they saw this ape-like monster I would have told them to see a psychiatrist. But what do you tell yourself when you see it, not once but on three separate occasions." Our second source said -- "I saw it! I saw it! Moving quickly through the trees. I'm glad someone was with me, at least I know I'm not going crazy." The next one said -- "I don't know what it was but I saw it. I was wandering around in back of the building when out of nowhere came the ugliest looking beast I have ever seen. It must have been a Sasquatch."

Strange Discoveries

CIA Infiltrates GHS

Sources close to the president have revealed that the recent installment of new P.A. system at Grimsley High School was merely a cover for the installment of complete surveillance equipment by the C.I.A.

Thus far the equipment, which consists of transmitters and videotape machines that create three dimensional films, has been used successfully. Surveillance in rooms other than classrooms is being conducted by more discreetly placed machinery.

One third floor, main building teacher has been placed on an enemies list. This teacher was recorded brainwashing students with the communist manifesto and showing pornographic films. The C.I.A. is missing several of its films of pornographic films and some films of films of pornographic films. A search has been conducted, but no clues have been uncovered.

Several C.I.A. agents have had nervous breakdowns since viewing films of algebra classes. These films have been destroyed and no more are being shot, so only students must suffer through the grueling complications and possible insanity of algebra.

A certain biology class has been exposed teaching reproduction through demonstration. At this point, no action has been taken.

Other agents have gone totally

insane and have been shot after viewing footage of the drama department at work (doing whatever it is that they do).

A Home Economics teacher teacher was discovered instructing girls on how to marry a rich man and poison hi later so as to be left with his money. This teacher has been removed from GHS, though she escaped to Europe. The authorities have confiscated over \$50 million of assets.

One member of the administration has been taped while singing. The tape was destroyed after playing it shattered windows in the CIA's main office.

So far no CIA agents have survived viewing the tapes made of the journalism department. The president has issued an order to quarantine the HIGH LIFE staff for medical science and possibly as an ultimate weapon for the U.S. if it can ever be found in a classroom at one time. There is doubt that this feat can be accomplished.

Tapes will continue to be made as the CIA keeps GHS under observation. According to one

agent "No word has been created to explain how this surveillance has affected us. Shock is a great understatement."

Rumor has it that the president has decided to send Amy to high school until it can be proved that GHS is a fluke and there are sane high-schools.

Babies for \$29.95

Grimsley student Alfred X. Ray says he has found out how to produce human babies for the incredible low price of \$29.95. The kit comes complete with electro-motor, one Sabrina doll (with remote control wetting device) and one week's supply of electroencephalograph paper to watch your kit baby's brain jump "when you apply the juice!"

That quote was taken from Mr. Ray while being escorted off by the police officials yesterday for evaluation.

Earlier in the day, Mr. Ray had been seen gulping large amounts of smouldering liquid from a large green test tube labeled "T. Bird". The liquid, not yet positively identified by research officials is believed to be some sort of tile remover. High Life readers will be kept posted as further reports come in.
