Realizing King's Dream Begins With You!

The impact of a leader such as Dr. Martin Luther King, Jr. can not be measured by Nobel Peace Prizes, celebrations or holidays. The true merit of his peaceful revolution has been left in

the hands of citizens like you and myself...the people who make those dreams a reality.

Thirty years have elapsed since Dr. King led one of the most historically meaningful

marches in Washington, DC. Still there are social and economic deprivations of persons of color all across "The Land of the Free". In order to correct these wrongs we must begin

with the individual. Those individuals must come to terms and work for a common goal. After those goals are accomplished on the local level then realistic 'freedom' can and will be attained across this country.

During this time of the year when we serve notice to one of the worlds most dynamic leaders of non-violent revolution, we at The AC Phoenix take time out to look at where the black business community has been and the ultimate destiny of our being. The Minority Business League and its President, James Grace are presently in the state of reorganization, while at the same time making plans for East Winston and the black community as a whole.

The MBL, which is a predominantly black corporation, is always reaching out to business that could use the guidance and support that they are qualified to give.

Nelson Petree and Thirty Black Men (TMB) are setting a tone for future black businessmen and community leaders by forming an investment group. This organization has the potential to create jobs in our community, as well as setting a good example for our youth.

Ms. Virginia K. Newell, one of the cities most notable leaders, and ladies investment mutual Enterprises is on the verge of closing the gap between incomes of men and women in the Winston-Salem area. Dr. Newell has always been an avid believer in the 'pooling of sources', and her dreams are certainly on the right track.
