REPORTS BY THE TEACHERS.

The orphans are divided into Four Graded Forms, each in charge of a teacher, whose report is printed every fourth week The highest number is 10; the lowest is 1. When the average is below 5, the orphan is liable to be discharged as not "promising," and therefore excluded by the regulations. This paper contains the report made by the teacher

Rev. Thomas Ogburn and Rev. R. S. Webb of Franklinton have been assisting our Methodist pastor in a protracted meeting and have visited the Orphan Asylum and talked and prayed with the orphans. We are always glad to have the children see and hear such men. Mr. Ogburn will preach to the children again ne. t Sunday at 5 p. m.

-Some kind friend sent the orphans a rock fish; it was a noble specimen, and furnished a meal for a 120 delighted little ones:

FAITH IN THE FAMILY.

One of the most intelligent women I had ever known, the Christian mother of a large family of children, used to say that the education of children was emineutly a work of faith. never heard the tramping of her boys' feet in the house, or listened to their noisy shouting in their play, or watched their unconcious slumbers, without an inward, earnest prayer to God for wisdom to train them, and for the spirit of the Highest to guide them. She mingled prayer with counsel and restraint; and the counsel was the wiser, and the restraint was stronger, for this alliance of the human and Divine elements in her instruction and discipline. And at length, when her children had become men and women, accustomed to the hard strife of the world, her name was the dearest one could speak; and she who "had fed their bodies from her own spirit's life," who had taught their feet to walk, their tongues to speak and pray, and illumined their consciences with the great lights of righteousness and duty, held their reverence and love, increased a thousandfold by the remembrance of an education that had its inspiration in faith in God, and its fruit in the noble lives of upright, faithful men .-- Selected.

MARK THIS, BOYS.

"Did you ever know a man who grew rich by fraud, continue successful through life, and leave a fortune at death ?"

This question was put to a gentleman who had been in business forty years. After reflecting for awhile, he replied: 'Not one. I have seen many men become rich as by magic, gain golden opinions, when some little thing led to an exposure of their fraud, and they Five fallen into disgrace and ruin. Arson, perjury, murder, and suicide are common crimes with those who make haste to be rich regardless of the means." "He that hasteth to be rich hath an evil eye, and considereth not that poverty shall come upon him." Prov. xxviii, 22.

SARATOGA FRIED POTATOES .-The following is said to be all that is of Cook's secret for producing those world renown potatoes served at Moon's Lake House, at the Saratoga Springs, every summer: Peel good-sized potatoes, and slice them as evenly as possible; drop them into ice water. Have a kettle of lard, as for fried cakes, and very hot. Put a few at a time into a towel, shake them about to dry them, and then drop into the hot lard. Stir them occasionally, and when of a light brown take them out with a skimmer. Ifproperly done they will not be at all greasy, but

A MURDEROUS SEA-FLOWER.

One of the exquisite wonders of the sea is called the opelet, and is about as large as the German sister, looking, indeed, very much like one. Imagine a very large double aster, with a great many long petals of a light green color, glossy as satin, and each one tipped with rose color. These levely petals do not lie quietly in their places, but wave about in the water, while the opelet clings to a rock. How innocent and lovely it looks on its rocky bed! Who would suspect that it would eat any thing grosser than lew or sunlight? But those beautiful waving arms, as you call them have uses besides looking pretty. They have to provide for a large, open mouth, which is hidden down deep among them-so hidden that one can scarcely find it. Well do they perform the duty, for the instant a foolish little fish touches one of the rosy tips, he is struck with poison as fatal to him as lightning. He immediately becomes numb and in a moment stops struggling, and then the other arms wrap themselves around him and he is drawn into the huge, greedy month, and seen no more. Then the lovely arms unclose and wave again in the water.

I have found that with all children it is necesary to throw yourself into their pursuits, and when their interest flags, take the lead yourself. Nothing helped our boys in the garden like going out myself with a hoe. Soon all would follow, and then when once they were started and interested I could leave. It was far better than finding tault with them. But the trouble was I would become so interested myself that I could not stop. The exercise certainly was good, and the boys loved to have my interest in the growth of every vegetable. They measured a water-melon so often to see its daily growth, that they broke its stem by constant lifting I had to look every day at the marks on the poles, which showed the growth of the beans, a general interest being felt to see which would reach to the top first. ANOTHER NATURAL BRIDGE.

A natural bridge, far more wonderful than that in Virginia, has recently been discovered in Elliott county, Kentucky. It is of solid stone, and forms a magnificent arch 162 feet long and 15 feet wide at the top, the river, the Little Chaney, rolling 100 feet below. Fifty yards above the bridge is a waterfall 60 feet high, and the view from the bridge is said to be extremely beautiful.

Dr. B. was called to visit a lady in Chelsea. After continuing his calls for some weeks, she expressed her fears that it would be inconvenient for him to come so far on her account. 'Oh, madam,' replied the doctor, innocently, 'I have another patient in the neighborhood, and thus I kill two birds with one stone!"
