Draw your own conclusions

It's a FACT. Almost everybody has a personal stake in America's self-supporting, tax-paying electric companies. There are millions of people on the stockholder lists of these companies — housewives, farmers, nurses, teachers, mechanics. You may be one of these many direct owners. But even if you're not — if you have a savings account or life insurance policy — you are included among the indirect owners of this industry. Your savings bank and insurance company put your deposits and premiums to work. A lot of your money goes into electric light and power securities. That's because years of dependable service and good business management on the part of the electric companies have made their securities a sound investment. Next time you hear anybody talking about the owners of the electric industry — remember, they're talking about you!
