JOHNSTON COUNTY

SHORT JOURNEY

Since map reading is a very important factor in the elementary grades especially the fourth grade classes under the direction of Miss Smith and Miss Wilder are concluding a unit in geography.

The objectives are to acquaint the students with the various kinds of map symbols and to develop a sense of time and place, distance and direction.

The students learned that there were map symbols of two kinds (1) semi-pictorial and (2) non-pictorial. Examples of the semi-pictorial symbols are railroad tracks and irregular lines for rivers and curved lines for parallels and meridians. Examples of non-pictorial symbols are parallel and meridian lines of latitude and longitude and blocks to represent counties and states.

Purposeful and effective play activities were provided for the children to be one of the leading motivations. The children had an interest concerning the discovery of deserts, deltas, gulfs, bays, capes and islands.

A very successful activity which was planned enthusiastically by the pupils was the trading of toy products that are native to certain countries in connection with the lesson.

The Short Journey School presented an entertaining program to the public on Friday, March 11th. The program was delivered before a large audience in the auditorium. Characters in the various roles easily memorized their parts and gave an excellent performance.
