Legality Of Negro Buses Is Probed In Tallahassee

As City Attorney James Messer sought a ruling into the situation, an estimated 500 Negroes attended a mass meeting and expressed "sympathy" for Cities Transit Company in its present financial plight. At the same time, they reaffirmed their stand to continue the boycott until Negroes win equal rights with white passengers on the Tallahassee buses.

Dan Speed, head of the Negro car pool, said his group had obtained a bus from St. Petersburg for the use in providing free rides, but it had been grounded pending investigation of its legality.

Predict New Pills Will Change Color From Black To White, Or Vice Versa

LONDON (ANP) — Twenty years from today, according to scientists, there will be pills available that can change an individual's color from black to white, or vice versa.

The London Times last week made this revelation in its Sunday Publication.

The newspaper said that doctors already have pills designed to give white people tan coverings. The pills are made of a drug extracted from citrus peel oil and were used

in cases where skins were too sensitive to sunlight.

The Sunday Times raised the question: "If white people can be made brown, can black people be made white?"

The paper quoted Dr. F. R. Bettley, editor of the British Journal of Dermatology, as saying there was no chemical reason why dark-skinned people can't be made white.

The publication said that extensive research was being done on this skin pigmentation process and

the possibilities were that within the next 20 years men would choose their color "by swallowing the right pill."

"Color," the paper said, "may yet be easier to eliminate than the color bar."

Tough Enforcement Policy Urged For July 4 Traffic

CHICAGO — With the nation facing an all-time high traffic death record this year, two leading traffic safety organizations have called for a tough enforcement policy during the Fourth of July holiday.

The National Safety Council and the International Association of Chiefs of Police said that appeals to driver responsibility must be supplemented by strict enforcement of the law to curb the heedless and reckless minority.

Such action is the only effective way to hold down the death toll on an immediate and short-term basis, the two traffic safety groups agreed.

The joint enforcement recommendations for the 30-hour Fourth of July period were:

1. Cancel all days off for police and put every available officer on duty. Assign as many personnel as possible in plain clothes and unmarked cars to traffic patrol, especially from 6 p.m. to midnight on Tuesday and Wednesday.

2. Concentrate manpower on high volume or high speed streets and highways where serious accidents are most likely to occur.

3. Concentrate on hazardous moving violations, especially speeding. Be alert for erratic driving and other evidences of evening-hour driving after drinking.

4. Coordinate the effort with other enforcement agencies.

5. Use whatever other enforcement means are available locally, such as radar.

6. Publicize the program in advance so motorists will understand and cooperate with the objective.

The Council estimates that there will be 50 million vehicles on the move during the holiday. Usually extra travel means extra hazard.

One hundred and sixty national organizations are participating in the Fourth of July effort to correct three main holiday driver faults—

1. Haste—to crowd the most fun into the shortest time.

2. Impatience—which leads to chance-taking as the result of congestion delays.

3. Drinking and driving.
