

ODDS and ENDS

ion of 2003 persons. It is not among the seven candidates and although he has well in the following may election, the results followed the usual trend and he was elected.

This year we have two candidates and what is more important we have two very good candidates. Both Dr. Madhuber and Mr. Hunter are equally qualified to serve on the City Council. We feel that both of them would not only represent us but also they would give a better representation to that body than we have had in the past. It is our hope that they will have many good ideas and efforts to have a better city for all race erected in the County. His failure should not be a discouragement for us but rather a challenge to us to do our best in making a better city for all persons on our City Council.

While we are waiting for the election of a new City Council, we have offered suggestions for the seven council seats, we should not have long had a list of the names of the four candidates who are offering themselves for election. One of the most important items of the present City Council is the lack of unity. There has been much bickering and squabbling and less actual work has been done in the term of the present City Council than in the term of the previous City Council. The present City Council has not shown any real leadership in the pressing needs of the city and their past actions do not indicate that a better city might be expected from them if they are re-elected. As such, we feel we have to do so, the best alternative which we have is to move, unless it is impractical to do so, to a new City Council. We will be on hand to help in the selection of a new City Council and to help in the selection of a new City Council.

For this reason we are not usually called upon to examine the records of the present City Council and more especially the records of those who are now seeking reelection in the list of candidates. We have not done so, but we have seen the records of those who are now seeking reelection in the list of candidates. We have not done so, but we have seen the records of those who are now seeking reelection in the list of candidates.

They have not only refused to make any efforts to do so, but they have also failed to offer any encouragement to the one or two individuals

\$27,000 To Further Experiment Program Awarded Morgan State

BALTIMORE, Md. — A \$27,000 award from the National Science Foundation to Morgan State College has been awarded to further the development of an experimental program in the field of chemistry. The program, which is being conducted by Dr. Charles H. Jones, president of the college, is designed to provide a more practical and self-paced method of instruction in chemistry. The program will be conducted in the form of a series of small, self-paced groups, each consisting of 10 to 15 students. The groups will be supervised by Dr. Jones and other faculty members. The program is expected to be completed by the end of the year.
