

FAYETTEVILLE FRESHMEN TAKE A BREATH — The nearly 200 freshmen at the Fayetteville State Teachers College take it in stride as they move from one Freshman Week activity to another. Here one group of them pair off as they take a breather in order to pose for the cameraman. Their smiles could indicate that it is all not so bad after all. Pictured here on front row is Jannetta Boyd of Henderson. On the back row (reading from left) are Joyce Wright, Clinton Samuel Morton, White Plains, N. Y.; Eva Gordon, Jamesville; and George T. Crisp of Morganton.

Atty. Edith Sampson Slated For B&P Women's Luncheon

PITTSBURGH, Pa. — Global Atty. Edith S. Sampson, Ex-Envoy to the United Nations and world-wide traveler, will share her vast knowledge and experience with the 400 delegates and friends at the Business and Professional Women's Annual Luncheon here on Saturday, October 12th in the grand Ballroom of the Hotel Sheraton.

Pittsburghers will put out the "welcome mat" for this most wonderful personality because they can boast of Pittsburgh's being Atty. Sampson's birthplace, and without a doubt she has gone far since leaving here. In 1930 and also in 1932 she was appointed as Alternate, United Nations Representative.

In 1951 she was guest lecturer of the Dept. of State in Germany and Austria. In 1952, she lectured extensively in the Scandinavian countries and in many European cities, as well as serving as an Observer for the National Council of Negro Women to the Sixth Session of the General Assembly in Paris. Then in 1955 Atty. Sampson traveled and lectured in Turkey, Egypt, Syria, Lebanon, Jordan, Iran, Iraq and Israel.

She is chairman of the Committee on International Relations of the Nat. Council of Negro Women & member of the Executive Board of the United Nations Assoc. of Chicago, Ill. where she now

Science Shrinks Piles New Way Without Surgery

Finds Healing Substance That Does Both—
Relieves Pain—Shrinks Hemorrhoids

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain without surgery.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations.

Pain was relieved promptly. And, while gently relieving pain, actual retraction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make astonishing statements as "Piles have ceased to be a

problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne) — the discovery of a world-famous research institution. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in a superior preparation form called Preparation H. Ask for individually sealed convenient Preparation H suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drugstores. Satisfaction guaranteed or money refunded.

At Bennett: Dr. Trabue Gives Four Addresses

GREENSBORO — The average college curriculum usually represents some kind of adjustment between different points of view. Dr. Marion R. Trabue told the annual fall conference of the faculty and staff at Bennett College here last week.

Dr. Trabue, professor of higher education at the University of Kentucky at Lexington, Ky., served as conference consultant and delivered four addresses in addition to participating in discussion groups.

Pointing out that each institution will have to define for itself what a curriculum will be, Dr. Trabue warned against permitting tradition to restrict the improvement of a college curriculum and urged that the people "who have to be involved in administering the curriculum should also be involved in the planning of it."

Successful curriculum-making, he declared, must take into consideration the needs of the modern world and the amount of preparation which each high school graduate brings to college. The desire to improve our common lot should be the most important thing, he added.

Among factors which influence curriculum-making, Dr. Trabue listed public expectation of the college, purposes for which the college was founded; boards of control, faculty and students, state, regional and national educational organizations, state departments of education and graduate schools.

"The purpose of making a curriculum study," he declared, "will have a great effect upon the results. If the study is made just to keep up with a trend, or if the president should decide that a study should be made principally to keep the faculty busy, it will be of little consequence. If, on the other hand, the study seeks to develop common points of view
