

Hampton Institute Instructor Returns From Liberian Position

HAMPTON, Va. — Growing public interest in scientific advancement was evident when the largest crowd of the season's public lectures series gathered at Oyster Hall, Hampton Institute last week to hear Dr. J. Robert Oppenheimer, world-renowned physicist, speak on "Science in a Changing World."

Introduced by the college president Alonzo G. Mason as one of the men in the world that knows most about the world we face, the atomic scientist declared:

"Our great increase in scientific knowledge is not reversible. We cannot unlearn how to make atomic and hydrogen bombs. It is appropriate to ask whether these changes haven't brought problems for which past history has not prepared us—the kind of problems we must learn to live with."

"We have an unprecedented imbalance between the old and the new. By the time a student finishes college, much of his scientific knowledge is out of date. I am not sure how well men can adjust to this rapid change," he continued.

Science Shrinks Piles New Way Without Surgery

Finds Healing Substance That Does Both—Relieves Pain—Shrinks Hemorrhoids

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations.

Pain was relieved promptly. And, while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make such astonishing statements as "Piles have ceased to be a

problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne)—the discovery of a world-famous research institution. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in suppositories or ointment form called Preparation H. Ask for individually sealed convenient Preparation H suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drug stores. Satisfaction guaranteed or money refunded.

Race Problem Our Greatest, Douglas Warns

CHICAGO (AP) — America's mistreatment of the Negro is its greatest bloc in the struggle with communism to win the uncommitted peoples of the earth, two thirds of whom are non-whites, Senator Paul Douglas (D. Ill.) told a luncheon group here this week at the Hilton Hotel.

Senator Douglas, who was here to receive this year's 1,000 Sidney Hillman award for his meritorious role in getting Congress to pass Civil Rights legislation, said that there had been a distinct improvement in the status of the Negro in the last 25 years but that the progress "had not been fast enough."

In civil rights cases, the Senator said, the burden of seeking court action is thrust upon individuals who cannot afford the cost.

"The obvious way to improve this situation," he suggested, "is for the government to enter the legal lists as the defender of those civil and constitutional and not merely as an arbiter of them."

Senator Douglas announced that he was giving \$500 of the award money to the legal defense fund of the National Association for the Advancement of Colored People and planned to distribute the other half among the American Friends Service the Catholic Council on Working Life, and the American Jewish Committee.

3 Educators Honored At RUE Confab

DURHAM — Three North Carolina educators who have contributed virtually 100 years altogether in total service to the state were honored here in N. C. College's Duke Auditorium Thursday afternoon by the 11th State wide Resource Use Education Conference.

Honored were Mrs. Clara S. Jamerson, teacher in the W. D. Wicker School Sanford; William R. Collins, principal of Johnston County Training School, Smithfield; and Mrs. Ruth Woodson, supervisor of state elementary schools for Negroes, Raleigh.

Dean George R. Johnson of Winston Salem Teachers College presented Mrs. Jamerson's award for 40 years service. Cited for 20 years as teacher and supervisor was Mrs. Woodson who received her plaque from NCC President Alfonso Elder.

L. Y. (Stag) Ballentine, N. C. Commissioner of Agriculture, and keynote speaker at the afternoon general session in Duke Auditorium presented Collins' award in recognition of more than 35 years as teacher and principal.

An important consideration in selecting the educators for their awards was their "ardent championing of the cause of Resource Use Education."

Dr. T. R. Speigler director of the RUE division at NCC, directed the state-wide conference which attracted some 1,200 delegates from 72 counties.

Dr. Tarpley Speaker At Fayetteville

FAYETTEVILLE—Dr. J. A. Tarpley, supervising principal of the Greensboro City Schools for Negroes, was the guest speaker at the Fayetteville State Teachers College on Monday, November 11 in connection with the celebration of American Education Week.

His address was drawn from the general theme for the week, "An Educated People Moves Freedom Forward."

The speaker insisted that the fusion of doubt and faith is a healthy sign in education. "Education and democracy," he concluded, must advance on the feet of our children.

Dr. Tarpley's address was sponsored by the Area of Education

"Supreme Court Decreed Impossibility Of Segregation," Johnson Tells Audience

DURHAM — Dean George M. Johnson of the Howard University Law School defended the rights of opponents of segregation to use legal means to state their case, but he condemned extremists who use inflammatory tactics, and urged Negroes to meet the challenge to provide a "climate for the acceptance of desegregation at the community level" in a NCC forum speech here Tuesday.

The 1954 and 1955 U.S. Supreme Court decisions constitute (1) "a judicial conclusion that racial segregation in education deprives students of equal educational opportunities and (2) a judicial directive to states requiring racial segregation in public supported education, to eliminate such requirements, that is, to desegregate."

The noted civil rights lawyer warned that "certain powerful and influential opponents of desegregation are trying to create the impression that" what the Supreme Court did in the Segregation cases was unprecedented, revolutionary and incapable of rational anticipation by lawyers, and cases have been cited by certain spokesmen which, it is said,

impelled this conclusion. "The record is to the contrary . . . The cases usually cited away at the separate but equal doctrine and clearly fore shadowed what was to be the ultimate decision on the question of segregation. It was probably obvious to any legal analyst that in the variant fact situations of both the Sweatt and McLaurin cases, the court indicated the impossibility of segregation rising to the dignity of equality . . ."
