

**34 BISHOPS ATTEND BROTHERHOOD MEETING** — The Council of Bishops of the African Methodist Episcopal Church and the Brotherhood, composed of 3,000 ministers in the denomination, met simultaneously in Chicago last week. The bishops accepted an invitation to meet with The Brotherhood. Above is a section of the

500 ministers reported at the session. The first row shows from left to right: R. Elwin Lamb, secretary; Bishops Carey Gibbs, Joseph Gomez, George W. Baber, Frank M. Reid, President H. Ralph Jackson, Senior Bishop Sherman L. Greene, I. H. Bonner, E. C. Hatcher and David H. Sims. Sims, (ANP PHOTO).

## Dr. M. L. King, Jr. To Bennett State College As Main Speaker Feb. 11

Dr. Martin Luther King, Jr., dynamic leader of the historical movement in Montgomery, Alabama, will speak at Bennett College, February 11, at 8 p. m., under the auspices of the local NAACP branch. Dr. King, who heads the Montgomery Improvement Association and is presently the Southern Christian Leadership Conference, is also pastor of the Dexter Avenue Baptist Church in Montgomery.

Winner of the NAACP's Spingarn Medal for 1957, the 25-year-old minister, whose speaking engagements have him constantly on the move from coast to coast, will be making his only Greensboro appearance of the year.

The meeting, which is expected to draw a statewide audience to the Annie Mcner Pfeiffer Chapel, will be presided over by Dr. Edwin R. Edmonds, president of the local branch. Dr. King will be introduced by the Rev. Charles W. Anderson, pastor of the United Institutional Baptist Church of this city. Special music will be provided by the Greensboro Men's Glee Club.

Dr. King, a graduate of Morehouse College, Atlanta, Georgia, is also a graduate of the Crozer Theological Seminary, Chester, Pa., where he was graduated first in his class and was president of the student body. He received his Ph. D. degree from Boston University.

The minister, who describes himself as an ambivert, "half introvert and half extrovert," was cat-

egorized into the national spotlight through his leadership of the boycott which brought about an end to bus segregation in Montgomery. A believer in the doctrine that Christian love can bring brotherhood on earth, Dr. King says, "There is an element of God in every man. . . . No matter how low one sinks into racial bigotry, he can be redeemed. . . . The strong man is the man who can stand up for his rights and not hit back."

"The spirit of passive resistance came to me from the Bible and the teachings of Jesus. The technique of execution came from Gandhi."

At present, he is heading a crusade sponsored by the Southern Leadership Conference to stimulate registration and voting in the South.

"Our major objective," he explained, "is to see that the Negro masses give meaning to the recently enacted civil rights bill by using it to the fullest possible extent. We will cooperate with any and all bona fide efforts to accomplish this end."

It is expected that Dr. King will devote a portion of his address to this general topic and relate some of his experiences—north and south in the interest of human rights and the dignity of the individual citizen.

### State College Hints

**DAIRY PRODUCTS CAN FEED UP A MEAL**—The National Dairy home economists say adding a cheese sauce is a nutritious way to dress up freshly cooked or left-over vegetables, meats, fish or fowl. Use 1-4 cup butter, 1-4 cup flour to two cups of milk, and add 1-4 pound of shredded cheese.

Keep several flavors of ice cream on hand in the home freezer or freezing compartment. There is no waste and no need of preparation before serving alone, or in "a la mode" desserts and sundaes.

Butter sauces pep up vegetables. Add lemon juice, celery, poppy or caraway seed, or garlic salt. High in vitamin A, butter is also a good flavor addition.

Use milk in cooking rice, cereals or poached eggs to add to their nutrition and flavor. Just substitute milk for the water in the recipe and be careful to cook over low heat.

**EXTRAS USES FOR COFFEE PARTICULARS**—Coffee percolators can be made to give a lot of extra service making instant coffee, hot malted milk, tea, cocoa and consommé from pillon cubes.

## Do's And Don'ts

**QUESTION:** How can I help my young pines become profitable?

**ANSWER:** To allow room for young well-shaped trees to grow to their best potential, it's important to weed out over-age and surplus trees. This means regular removal of diseased and damaged trees, branched and badly-shaped trees, vines and pecker species.

**QUESTION:** What effect will the big feed crops of 1957 have on livestock production?

**ANSWER:** Livestock marketing specialists say that it will affect livestock production two ways: by heavy feeding of hogs, cattle and lambs this winter; and by an increased farrowing of 1958 spring pigs.

The question is frequently asked, "What do we mean when we speak of soil pH?" Simply stated, it refers to the relative acidity, sourness or alkalinity, sweetness, of the soil. The pH of the soil affects the growth of all plants, and this is the reason lime is needed for some and not for others.

If we apply a set of values to the pH range, from 4 to 10, we can state the ranges as follows: 4 to 5, strongly acid; 5.5 to 6.5, slightly acid; 6.5 to 7.5 neutral; and above 7.5 alkaline.

It is common knowledge that the azalea and the camellia require acid soils with the azalea being more tolerant of acid conditions than the camellia. Applying the scale already given, the azalea would fall in the range between 4.5 and 5.7 and the camellia between 5 and 6. This is getting a little technical, but it illustrates my point.

Since the ranges are not significantly different, both plants are usually grown in the same general area. On the other side of the picture we find that legumes, such as alfalfa and sweet clover, require a pH range of from 6.5 to 7.5. Spinach, often used as a test plant, 6.5 to 7.5; gardenia, the same as camellia; cabbage, 6 to 7; tomato, 5.5 to 6.5; Irish potato, 5 to 5.7; sweet corn, 5.5 to 6.5; and so on down the line of plants.

Lime is used to sweeten soils and sulphur and aluminum sulfate to
