

**SCHOOL OF RELIGION GROWS**—The School of Religion at Shaw University is continually growing, announced Dean Grady D. Davis. Five students have enrolled for the second semester which started recently. This makes a total of around 25 young men, many of whom are doing full time pastorate work and others are used regularly by churches in the area. Pictured above are students and some of the faculty members for the 1st semester. (l-r.) Frederick D. Terry, president; D. N. Howard, reporter; Rabbi Harry N. Caplan, Dr.

Grady D. Davis, Dean; C. L. Manning, Dr. J. W. Turner, Percy Huntly, and Addison Williams. Back row, John Foster, Charles Railford, A. L. Bell, Paul Warren, Joseph Dickens, George R. Sellers, A. Johnson, George Parrish, T. C. Evans, Isaac Horton, Jr., J. C. Harris, Louis Pointer and William Freeman, secretary. New Members this semester are John D. Murdock, Johnson C. Smith University; John E. Hall, North Carolina College; Braxton Cooley, Louis Wade and Johnny White; all from Shaw.

## Powell Flexes Political Muscles; Dares The Democrats To Drop Him

NEW YORK — (AP) — Rep. Adam Clayton Powell, Jr., the controversial Negro congressman from New York's teeming Harlem district, last week challenged the Democratic Party to battle and dar-

ed the party to dump him in the coming congressional elections. He hurled the charge in an address at the Abyssinian Baptist Church, where he is pastor, and again at a mass meeting in Brooklyn.

## A-Bomb Pioneer Lectures During A & T College Series

GREENSBORO — An A and T College audience was told last week that nuclear developments might become a means of communication between man on the earth and inhabitants of other planets. The speaker was Dr. Lyle B. Bost, chairman of the Physics Department at New York University and one of the pioneers in the development of the atomic energy who delivered a series of lectures at the college on February 4 and 5. He said that many scientists today are confident on the proof that life exists on many planets, that inter-planet communications will one day be established but already anticipate the many problems of creating understanding through these communications. "It is almost certain," he continued, "that it will be difficult to explain what is an inch or a pound, except that we have some common measurement," such as may be found in the atom. Speaking from the subject, "Science in the Atomic Age," he told the audience that the overwhelming problem of the modern physicist is to put "rhyme and reason" into new discoveries yet unexplained.

Commenting on the probability the Demos may be planning to dump him because of his support of President Eisenhower in the 1956 election, Powell said the Democrats dare not drop him. "I dare them," he said. "If they buck me for reelection then there will not be a Democratic governor in Albany (State Capitol) next year. I promise that." Powell also took a pot shot at New York City Negro Political leaders. "There's no real free Negro leadership in this whole city," he charged. "They (Negro leaders)

are all slaves to the white folks who control them." He bragged: "Well, I am sure one man they can't control."

... be ye transformed by the renewing of your mind, that ye may prove what is that good and acceptable and perfect will of God.—(Romans 12, 2.) In our busy days we can get so involved that worrisome details crowd the Lord out of our minds. Then we should stop and, even in an instant of quiet meditation and communion with Our Heavenly Father, renew our soul through the inward flow of His love.

## Gov. Faubus Signs Edict Revoking NAACP Licence

LITTLE ROCK, Ark. — (AP) — The NAACP suffered another setback in its struggles here last week when Gov. Orval Faubus signed a proclamation which in effect dissolved the civil rights organization in Arkansas. The governor, who said he was not aware that his action affected the NAACP, revoked the franchise of the NAACP and about 300 other

democratic and out-of-state corporations because they failed to pay their 1957 franchise taxes. The NAACP could, under the state law, get its franchise back by paying the tax and applying for reinstatement, it was reported. The NAACP is currently involved in five lawsuits filed by State Atty. Gen. Bruce Bennett. The franchise issue stems from litigation.

### FOR WOMEN

#### FROZEN FRUIT PIES FOR EASY ENTERTAINING

One of the easiest ways to entertain a small group of good friends is to have a dessert-and-coffee party. You might schedule it on the night of a special TV show—one you know all your friends will want to see. Invite your guests to come over a half-hour or so before show-time and serve your refreshments informally from a coffee table in the living room.

It's a pleasant idea to provide a choice of desserts... two luscious fruit pies, perhaps. It's no more trouble—and takes no more time—to serve two kinds when you start with the ready-to-bake quick-frozen pies. There are four flavors to choose from—apple, blueberry, cherry and peach. Each of these comes in a generous family-size to serve four or five.

You might also like to serve a couple of different toppings to give the pies added glamour and a touch of your own individuality. A spiced sour cream topping and a fluffy lemon sauce go well with any and all of the fruit pies. And be sure to have plenty of piping-hot coffee on hand to serve with the pies and for refills during or after the TV show.

#### TO BAKE QUICK FROZEN FRUIT PIES

Preheat oven to 425 degrees F. (hot). Use sharp knife to cut two or three slits or a fancy design near center of top crust. (Slits allow escape of steam during baking.) Put frozen pie in foil pan on baking sheet. (Baking sheet helps to brown bottom crust.) Bake in hot oven until crust is golden brown and filling is bubbly—about 40 to 50 minutes.

METHOD: Put egg yolks in top of double boiler and beat well. Add 1-4 cup sugar, the flour, salt, water, and 1 tablespoon of lemon juice; mix well. Place over boiling water and cook an 8 stir until smooth and thickened. Then remove from boiling water and add butter, lemon rind, and remaining tablespoon of lemon juice.

Beat egg whites until foamy. Add 2 tablespoons sugar gradually, continuing to beat with egg beater until meringue will stand in soft peaks. Fold hot lemon mixture gradually into meringue. Cool. Chill, if desired. Serve with warm or cold fruit pies, cobblers, or other desserts. Makes about 1-1/2 cups sauce or enough for 5 or 6 servings.

Combine all ingredients and mix well. Chill. Serve with warm or cold fruit pies, cobblers, or other desserts. Makes about 1 cup topping, or enough for 4 to 6 servings.

## Tourney Gets Underway

MONTGOMERY, Ala.—(AP) — The Alabama State Golden Gloves Tournament, sponsored by the Montgomery Boxing Association, got underway at Alabama State college, Monday, Feb. 17. In the tournament are teams from various sections of Alabama, as well as Jackson, Tenn. Several state champions are slated to defend their titles. Alabama has produced several top Golden Glovers, among them Jim Boyd, U. S. representative

Complete Line of Nutone Fans, Hoods, Chimes and Accessories in Stock

50% Discount on all other Lighting Fixtures and, remember, we furnish Bulbs FREE with exception of fluorescent and floods. Our lighting consultant will be glad to assist you.

## Electrical Wholesalers

911 N. West St. Dial TE 3-5588

CP&L's span of service since 1908 bridges the years from the carbon lamp of Edison's design to the modern lighting and appliances you see in your home today. And as we celebrate our Fiftieth Anniversary, the wonders of the atomic age begin to unfold.

The story of CP&L is a story of Carolinians, both employees and customers. It is only fitting at this time that we pay particular tribute to our employees. Through their loyalty, initiative and industry, CP&L has grown from a handful of pioneering businessmen in 1908 to its present staff of 2200. It typifies what American ingenuity can do in an atmosphere of freedom.

Without such individuals, CP&L could never have grown from 1147 customers in 1908 to the more than 400,000 today. Nor could we now serve families in an area of 30,000 square miles where once we served but three towns.

A most important factor in CP&L's progress has been the way that Carolinians have adopted electric living as the modern way of life. For this reason, our generating capability has mushroomed from a first year figure of 4,000 Kilowatts to a 1958 figure which will exceed 1,300,000 Kilowatts.

But above and beyond our service as an electric utility, CP&L has first been a citizen wherever it serves. Throughout its history, CP&L has been concerned with the development of the area it serves. The most recent tangible evidence of this philosophy is our sponsorship of the Finer Carolina Program.

The progress made during our first fifty years of service to Carolinians is a matter of much pride to all of us here at CP&L. We intend to maintain this tradition of service and we dedicate ourselves anew to an even Finer Carolina in the years that lie ahead.
