

HOW DID THIS HAPPEN?—Miss Carole Wade (2nd from left) of Graham, managed somehow to get her French horn into this wood wind group, which engaged in an outdoor jam session on the Bennett College campus. Apparently, there were no sour notes as the expressions on the faces of the others will attest. Left to right: Eleanor Bell, of Wilmington; Diamia Croslin, Charlotte; Grace Atkinson, Four Oaks; and Carole Anderson, Greenville, S. C.

No One Like Her!

A 70 hour week is nothing new to Mother. And when it comes to running a home, raising a family and managing the finances so there is a little left over each month, she has no equal. Mother is a mighty important person around our bank, too. Next Sunday, with some tender word or gift, let's not forget that it's Her day, Mother's Day.

Youth Gangs Fined For Gun Rumble

MEMPHIS (ANP) — A bullet-splattered "rumble" between two juvenile gangs ended in a city court with five boys assessed a total of \$550 in fines.

They were also bound over to the grand jury on an added charge of common affray, defined as taking part in a fight that caused public terror. Five others were sent to juvenile court.

Capt. W. W. Wilkinson said the rumble (slang talk for a gang fight) came five days after a group of boys from the Lauderdale Court area tried to crash a party in the across-town Riverdale area.

Wilkinson said a Lauderdale patrol, seeking revenge and led by a lad armed with a .38 revolver, met a Riverside crew led by a boy armed with a .22 pump rifle.

Witnesses said the resulting gunfire, "sounded like a machine-gun."

State College Answers

QUESTION: How can I keep my soil from becoming packed like concrete?

ANSWER: Here are three suggestions made by an agronomy specialist: (1) Don't put machinery into the field while the soil is wet; (2) develop a minimum tilling system (in other words tilling the soil as little as possible); and (3) rotate soil with pasture or grass crops or green manure crops. Ask your county farm agent for advice on this problem.

QUESTION: How can I get rid of Bermuda grass in my garden plot?

ANSWER: You can remove the grass by treating the bed with methyl bromide, by removing all roots by hand, or by treating the area with soil sterilant such as "Aticide," "E. C. A," or "Daisapon." If you use soil sterilant, you'll have to wait several weeks before planting. Once all Bermuda grass is removed, chemicals can be used around the garden and along the borders to keep the grass from reentering. If it creeps back into the garden, however, it'll have to be removed by hand.

QUESTION: What is the best way to control alfalfa weevils?

ANSWER: Control centers around the use of heptachlor, either as a dust or spray. It takes 10 to 15 pounds of a 2.5 per cent dust or one pint of a 25 per cent emulsifiable concentrate in water per acre according to the capacity of spray equipment used. Heptachlor may be used up to one week prior to cutting.

Garden Time

Daffodils and tulips give us much more pleasure in early spring and are to be found in most of our gardens. The question is: should they be taken up every year, every second year, or every third year?

It is not necessary to lift daffodils every year but it is highly desirable that the bulbs be dug, divided, and replanted every third year. This gives them a better chance to grow and reproduce. If your need to be moved, wait until the leaves begin to turn yellow before digging.

While the leaves are still green, they are manufacturing food and storing it in the bulbs for next year's flowers. They may be dug, divided and replanted immediately, or they may be dried and stored in a cool place and held for fall planting.

The tulip is somewhat different. Bulbs should be taken up and replanted every second year. The bulbs may deteriorate rather rapidly and for this reason it is sometimes best to buy fresh bulbs every year if large flowers are desired. If bulbs are to be replanted, do not dig them until the leaves turn yellow, as was the case with daffodils.

Bearded (German) Iris is blooming now in our neighborhood and will be ready to divide and transplant in about a month. However,

plants may be divided and transplanted any time during the summer in a deeply fall. A good division consists of a new rhizome, or thickened underground stem, with a cluster, or fan, of leaves.

After the division has been made, the rhizome should be planted so that the top of it will be even with the soil. Deep planting is not desirable. Bearded Iris do best in well drained soils which dry rather quickly.

Cool weather in the spring frequently interferes with fruit setting on tomato plants. This is particularly true of the first two or three flower clusters that are formed. Hormones, or plant regulators, applied to these first clusters may give you earlier tomatoes and more total production. They may be purchased from your seedsman under the trade names of "Blossom Set" or "Fruition." If you want to experiment, use one of these materials according to accompanying directions. Spray on the open blossoms with an atomizer or fine spray.

STRENGTH FOR THESE DAYS

And we know that all things work together for good to them that love God... (Romans 8, 28.)

When we truly love God, heart and soul, we put our complete trust in Him, joyously surrender our will to His. And, as He is all-good and naught but good—all that comes to us will be good, in abundance.

"Negroes Become Race Of Educated Women, Illiterate Men:" Dr. Moron

HAMPTON, Va. — (ANP) — The Negro race is "gradually becoming a race of educated women and illiterate men," chiefly because far too few boys are finishing high school, while the girls are becoming college graduates.

This view was expressed last week by Dr. Alonzo G. Moron, president of Hampton Institute, before a conference of public school personnel meeting on the institute's campus.

Dr. Moron said that out of 29,905 high school graduates counted in the 1930 census, 17,995 were women, of 9,905 college graduates, nearly 8,000 were women.

Economics is the chief reason for the failure of boys to continue their education, Dr. Moron said. Boys of high school age

find it easy to get jobs, and frequently drop out of school to help their families.

In so doing, they miss the opportunity for higher paying jobs for which their interrupted education does not qualify them. Dr. Moron noted that Hampton receives more requests for male graduates than it can fill.

On the other hand, the girls, because they find jobs difficult to procure, except as domestics, continue their education.

With one defaulting on and the other completing education, another problem arises—a social problem. The girls finishing colleges find they have difficulty locating men who share their interests and academic background.

"If this trend continues," Dr. Moron said, "we can expect that the Negro family as an institution may become more disorganized because of the increased number of marriages between intellectually incompatible men and women and a resulting increase in divorce and broken homes."

He noted that unless parents, high school counselors and the young men themselves take action

to correct their education deficiencies, they can expect to become the modern counterpart of the "hewers of wood and drawers of water."

The average dairy cow in milk requires up to 30 gallons of water daily.

Play for Fun and Profit! Free Awards Worth More Than \$200,000

"CROSS-OUT GAME"

Here Is This Week's Set of New Game Numbers

PLAY CROSS-OUT again this week! It's your opportunity to share in wonderful awards such as milk stoles, RCA color television sets, Westinghouse washers and dryers, and many other valuable items!

IT'S EASY! All you do is match the game numbers against the numbers on your free CROSS-OUT cards from Colonial. Ask for your free CROSS-OUT card, like the sample shown at left, each time you visit Colonial. There's no obligation, nothing to buy. See complete rules and list of prizes on each CROSS-OUT card from Colonial.
