

GREETING A ZION BISHOP — Dr. John R. Larkins, Consultant, Public Welfare for the state of North Carolina, left, and Alexander Barnes, Director of Public Relations and Social Welfare, A.M.E. Zion Church, right, are shown as they greeted Bishop H. B. Shaw as he arrived at the Hebekon N. J. pier from a trip around the world. Bishop Shaw expressed a great delight in being back home.

"My Family Has Given \$55 Million For Negro Education," Nelson Rockefeller Tells Powell

NEW YORK CITY — (AP) — Obviously nettled because of some remarks made by Congressman Adam C. Powell, Jr., Nelson A. Rockefeller, Republican candidate for Governor of New York, told reporters that his family had given over \$55 million for Negro education.

"I am reluctant to say this," stated Mr. Rockefeller, "but events in the past twenty-four hours force me to make a statement."

"I don't like to talk about this—I never have before—but my family has given more than \$55 million to Negro education."

"I'm very proud of these contributions to the Negro cause."

"I am correcting misinformation about my own record. I have no intention of throwing stones. There is too much important work to spend time slinging stones."

Rockefeller later spoke before the Empire State Baptist Missionary Convention at the Metropolitan Baptist Church in Harlem.

"I have insisted," he said, "as Negro business men, all my business endeavors that Negroes have equal opportunity for jobs and it is one of the great satisfactions of my life that a number of them are moving steadily up on the economic escalator in the organizations where I have some control."

Gov. Wilkins and Attorney Thurgood Marshall pointed out subsequently to newsmen that the Rockefeller family had made substantial contributions to the NAACP.

Winthrop Rockefeller, who is currently aiding his brother's campaign, is reported to have contributed \$100,000 towards the ac-

quisition and remodeling of the headquarters of the National Urban League in lower Manhattan. However, Congressman Powell, who touched off the fireworks, told the A.M.E. ministers at the Bethel A.M.E. Church in Harlem that Rockefeller was campaigning "on the basis of philanthropy" and that he was doing "nothing more than a mass production method of trying to buy the vote."

Powell indicated that Negro leaders in Arkansas had not been able to get "a single bit of cooperation from Winthrop Rockefeller in their long fight."

The next day former President Harry Truman joined Governor Averell Harriman and Powell in a "walking tour" of Harlem. An outdoor rally was scheduled by Harlem Democrats in front of the Hotel Theresa.

Leg Blood Movement May Help To Prevent Clots

CHICAGO (AP) — Keeping a patient "walking" during surgery may prevent the formation of death-dealing blood clots, two Canadian surgeons have suggested.

When movement in leg muscles is reduced—as during surgery—the blood pools in the legs and conditions are set for the formation of blood clots.

By keeping the patient "walking" through the electrical stimulation of the leg's muscles, this pooling is reduced. The stimulation causes the muscles to contract as they do in walking and to act as a pump, forcing the blood back to the heart.

When clots form, parts of them may break off and move through the vessels, eventually blocking the artery between the heart and lungs. This condition, known as pulmonary embolism, frequently causes death.

Pulmonary embolism is now the commonest single cause of death following major surgical procedures, Drs. John and Angus D. Mc-

Lachlan said in the current (October) Archives of Surgery published by the American Medical Association.

They believe that blood pooling (venous stasis) in the legs is the prime factor in pulmonary embolism, although it has not been definitely proved. Prevention of pooling would lessen the possibility of clot formation.

The doctors have used skin electrodes similar to those used in the study of the heart's electrical activity. The electrodes are placed on the legs and the closed electrical circuit produces regular contractions of the calf muscles during the operation and until the patient is conscious enough to move about.

peripheral venous heart" active during operative procedures will lessen the frequency of pulmonary embolism," the doctors concluded. The authors are members of the department of surgery at the University of Western Ontario Faculty of Medicine, London, Ont.

North Carolina farmers need to use 10 times as much lime as they now use to overcome soil acidity and three times as much as they now use just to maintain productivity at its present level.

Textile plants are expected to use about 1-2 million bales of cotton in 1958.
