

Home Demonstration Achievement Day Observed In County Building

Some 200 women attended the annual Home Demonstration Achievement Day held in the auditorium of the Wake County Office building last week.

Mrs. Cora B. Taylor, council president, presided over the meeting which featured introductory remarks by Mrs. Corina Dunc, vice president; county summary by Mrs. Isabella Adams, secretary; special

music by the Home Demonstration Choral Group under the direction of Mrs. Bessie Feathers and Mrs. Mattie Scott.

"How Much Freedom Should Children Have?" was the title of the panel discussion. Panel members left the group with the idea that in spite of changing times parents should lend a guiding hand and set the example for children to follow.

Panel members were: Mrs. Mary Squirewell, chairman, Eagle Rock Club; Mrs. Sovie Trice, Fuquay Springs Club; Russell Adams, Juniper Level; Jonah Hodge, Riley Hill; Mrs. Mabel Robinson, Riley Hill Club.

Recreation at the close of the program was conducted by Mrs. Annie Jones of the Shotwell Club. Winning club exhibits were: Fuquay Springs, "Sew and Dress

Well On A Low Budget," Fletchers Grove, "Stock Your Pantry," Eagle Rock, "Home Sewing Center."

Other exhibitors and exhibits were: Zebulon, "Figure Flattery," Springfield, "Steps In Freezing Vegetables," Shotwell, "Study A-ven," Riley Hill, "Well Groomed Feet," New Light, "Entertain At Home," New Hill, "Pans for Range Top and Oven Use," Juniper Level, "Sleeping and Lining Garments," Juniper Level, "Linenery," Juniper Level, "Brazel Creek," "Select Quality Bed Linen."

Judges were Mrs. B. M. Edwards and Mrs. Primrose Jackson.

Tuskegee Given Grant In Excess Of \$230,800 By NSF

TUSKEGEE, Ala.—The National Science Foundation has awarded Tuskegee Institute a grant in excess of \$230,800 in support of an Academic-year Institute designed to help high school science and mathematics teachers improve their subject matter knowledge. A total of 32 colleges and universities will share a sum of over \$8,000,000 in this program slated to reach 1500 teachers of science and mathematics.

For the past two years the National Science Foundation has sponsored Summer Institute

at Tuskegee Institute, and 197 other colleges and universities. Dr. T. H. Foster, president of Tuskegee Institute, stated that the experience of conducting these two Summer Institutes will contribute much to the planning and operation of this newer and bigger program of the National Science Foundation.

Dr. W. Edward Bolton of the Department of Chemistry at Tuskegee who directed the Summer Institutes will be responsible for carrying out the general provisions of the foundation's proposal in the new program.

Each of the 32 colleges selected will enroll approximately 50 teachers in programs covering periods of from nine to ten months. Provisions in the grant make it possible for in-service teachers to receive stipends, allowances and travel to offset loss of current salaries. The program will begin with the 1958-59 academic year.

The Academic-year Institute program is being expanded by the foundation because of its success in helping science and mathematics teachers improve the quality of their own teaching through enabling them to keep abreast of the latest scientific developments. The influence of these teachers on others with whom they come in contact is such that it raises the general level of science instruction in the secondary schools and also provides motivation for students to undertake science careers.

Tuskegee Institute is one of 25 institutions which will sponsor general programs in both science and mathematics. The other seven will concern themselves with mathematics only. Both Tuskegee Institute and Atlanta University, another institution to share in the program, are member institutions in the United Negro College Fund, an educational trust-fund for 33 privately supported institutions.

Will you leave these freedoms to your children?

Men have died to leave you these 4 symbols of freedom:

- A Holy Bible—symbol of your right to worship as you wish. (First Amendment, U. S. Constitution)
- A door key—your right to lock your door against illegal government force and prying. (Fourth Amendment, U. S. Constitution)
- A pencil—freedom to speak or write what you think, whether you agree with the government or not. (First Amendment, U. S. Constitution)
- And a free ballot—your right to choose the people who represent you in government—your protection against government tyranny. (Article I, U. S. Constitution)

Half the world is trying to destroy these 4 symbols and what they stand for.

Even in this country, there are people who threaten our freedoms, by trying to give the U. S. government more and more control over American life.

They have a start—already the government runs hundreds of different kinds of business in competition with its own citizens. And you read about proposals that government take over even more.

The electric light and power business,

for example. The federal government runs some of it now. And Congress is being pressed to take over still more. Even though every such step leads down the road to socialism, one thing most Americans don't want.

If socialism comes to America this way—step by step—you'll never have a chance to vote for or against it. For by that time, government will control your job, your independence, your thinking. Then what freedoms will you be able to pass on to your children?

Student Prexy Inaugurated At Tenn. State

NASHVILLE, Tenn. — Tennessee State University's 1958-59 Student Council president, William F. Greer, son of Mr. and Mrs. T. S. Greer, Miami, Florida, was formally inaugurated during annual ceremonies last week.

The oath of office was administered by vice president of the senior class and basketball captain, John Barnhill. The inauguration is directed annually by the political science area and allied departments of the university under the direction of Dr. Susie O. Bryant, senior class president Larry Greene, delivered the challenge to the student council president.

Reminding the students that they as members of today's generation, "have a rendezvous with destiny," political science major Greer solemnly quoted that "Government is good when it makes happy those who live under it, and attracts those who live afar."

Dr. W. S. Davis, president of Tennessee State, closed the inaugural ceremony with remarks gratefully accepting the words of the student council president who said, "The courage and vision of Dr. Davis, more than any other factor has resulted in the fact that Tennessee State has attained the status of a full-fledged land-grant university."

Tips on Touring

More For Less

Of course you know why George Washington was able to throw a silver dollar across the Rappahannock — because money went so much farther in those days!

We all know it's no joke that in general the value of our dollar has lessened over the years. So it's always nice to find an area where the

reverse is true.

Such a report came to my attention recently. According to this study, the average car on the road today gets 70 per cent more real mileage out of a gallon of gasoline, and at 18 per cent less cost (exclusive of taxes), than the average car got in 1930.

The study is based on ten-miles per gallon — that is, the number of miles one gallon of gasoline moves one ton of automobile.

At a cruising speed of 40 miles per hour, says the report, one gallon of 1930 gasoline moved a ton of 1930 automobile 29 miles. A gallon of today's gasoline moves a ton of automobile 44 miles.

The gasoline needed to move a ton of automobile costs 54 cents a mile today, excluding taxes. It cost 65 cents a mile, excluding taxes in 1930.

Even allowing for the 132 per cent increase in gasoline taxes since 1930, the study continues, gasoline is still a big bargain. Including taxes, the relative costs are 76 cents today as compared with 81 cents in 1930.

The dollar you spend on gasoline gets you a better buy than ever.
