# ROGRESSIVE ROSPERITY By CHRISTOPHER G. HAZARD

Western Newspaper Union.

WE look into the immediate A future and greet a New Year there is one fixing that we want to see upon the field of bistory, the figure of prosperity, It may be that we think that we do see it while we are really gazing upon a mirage. Hope al-ways tells a flattering tale and is ready to be the father of thoughts, Imagination is akin to faith, but requires no real basis. If our op-timistic outlook is warranted it is so because we can believe in a prosperity that is to be real because it will be the product and the possession of us all.

 $\P$  Civilization is the sum of co-operative intelligence. All the capital in the world could not mine could without miners, and all the miners in the world could not do it with-out capital, fills wealth has proved no more than accumulated useless ness in eastern countries; men have starved to death in the midst of vast but unappreciated natural resources. While the employment of money and the wise direction of labor have given to the West Ha immense advantages of social and econecids riches and well being

TRussh is perishing under the incubus of a statuent communism that takes away the incentives of progress, buildes leadership lives upon test accumulations while they last, and starves afterwards. The interchange of abilities is cut of, the social cloud time of neces-sart differences in people is are rested, the rewards of a genius for affairs are withheld, moduction in ended and presperity lynched. It is like a vast body wherein there no elseulation of social life blood,

University has the ventile of the second sec collectivism admits of. When th crew cannot unvigate the shi there is no advantage in Hillin the captain. It isn't necessary t have tyranny in order to have captain, but society and business must have leaders and governor and there cannot be two captain on any ship.

Cafter all, men hardly expect pass for more than they are world The real kick in our democracy 1 against false differences. Gers i the iand of a fair chance. It i the home of opportunity. No crus keeps merit down. In an inte change of values every one her

The make the most of himself. In doing this he will need an use his fellows. No can ever suc-ceeded yet in being great or pros-perous as a hermit. We climb u upon each other. It takes us all t make and to keep civilisation. man owes himself and his fortun to society in a very large degree Are we not all members of a gre and wealthy body politic, where no one can live to himself or d without loss to the rest?

Let a dozen men, each man of ing his neighbor five dollars, sit a circle. Let one of these take five-dollar bill from his pocket an pay his debt to the man next him. Let this man pay his neig bor and the next man pay his un the bill shall have gone round the circle and returned to the man who started it on its round. This man may return the bill to his pocket with the happy conscious-ness that he has paid his debt and also received what was due him, and that every other man in the group has the same satisfaction. But if the first man had not started the bill going there would have been no auch results. He would have illustrated Russia, Instead of America. The secret of civilization is the irculation of ability. It is the secret of prospericy. Let every man circulate his worth to society, so shall there be a true communism, also a true capitalism. There is a conundrum which asks why one should prefer a dollar bill to a gold dollar. The answer is, "Because, when you put it into your pockat you double it, and when you take it out you find it in creases." Prosperity progresses as we pass on what we are and have.

### A TIMELY RESOLUTION

"Ralph." said his father, "what good resolutions are you going to make for the new year?"

"Tm not going to fight with Frank Ress any more," replied Raiph. "Tm giad to hear that, my boy," said his father; "but why did you make that resolution?"

" Cause," was the answer, "I al-ways get licked."
