

# WEST LIBERTY IS TURNED BACK BY A. S. T. C. SQUAD

Breath-Taking Line Plays Feature Head-Boiled Interests Gridiron Battle Final Score 13-14. O'Hare and Harris Score for Locals West Liberty Shows Beautiful Passing Attack to Score in First Quarter.

Appalachian State Teachers College, capturing a beautiful brand of football, defeated the young West Liberty State team by the score of 14 to 13 on Saturday afternoon. The West Virginia team had been defeated only once in the past two years and was playing at the West Liberty school a beautiful passing attack to score in the first ten minutes of play. The Mountaineers then came back with quick switches and a great variety of plays to drive the college to their own five-yard line but they were held in down.

Early in the second quarter O'Hare intercepted a pass and the West Virginia team soon scored again as Jones received a pass and ran thirty yards for a touchdown. The pass was incomplete for the extra point. The Mountaineers started another drive when Harris hooked for 25 yards and O'Hare twisted a 10-yard pass to Canine for a touchdown. O'Hare dropped the ball.

In the third period the State team smothered all running attacks and the Mountaineers were forced to pass. O'Hare intercepted a pass and ran for a touchdown. A few minutes later Harris broke loose for 30 yards and a touchdown. O'Hare again kicked the extra point, which gave the Mountaineers a one-point lead when the West Liberty team was never able to overcome.

Score by quarters: Appal. State 14, West Liberty 13. Length of quarters, fifteen minutes each, including timeouts. Appal. State: J. Harris 1, F. West Liberty: Jones 1, Canine 1. Points after touchdown: Appal. State 14, West Liberty 13.

During last season Appalachian State was defeated by West Liberty in a football game.

# Hypnosis Stirs Memory To Reveal Man's Past

Dr. C. Young, professor of psychology at Louisiana State University, has used hypnosis to reveal a man's past. The man, who had been hypnotized, revealed that he had been a slave on a plantation in Louisiana. He also revealed that he had been a member of a secret society. The man's past was revealed through a series of hypnosis sessions.

# LIME AND SOIL SUBJECT AT TENNESSEE CONFERENCE

The need to use more lime on all soils where such a practice is profitable is the subject of a conference at Knoxville. The conference was held at the University of Tennessee at Knoxville and attended by C. B. Williams and G. E. Willis, agronomy workers at North Carolina State College. Reporting on this conference, Mr. Williams, head of the department of agronomy at State College, said there was a general agreement among the scientists present that the heavier types of upland soils should be limed to a neutral or slightly acid reaction for growing red clover, alfalfa and sweet clover with the precaution that the lime should be added well in advance of planting and given time to react with the soil.

# SPECIAL NOTICES

FOR RENT—Nice new five-room house in Daniel Boone Park, modern conveniences. See Edw. N. Hahn. 10-16-4t.

FOR SALE—Good cooking apples, 50c; unselected picked apples, 75c. Well-sprayed, clean fruit and a number of varieties. Rich Mountain Orchards, R. L. Baldwin, Manager, Zionville, N. C. 9-25-3t.

Dr. C. B. Baughman, Eye, Ear, Nose and Throat Specialist, Johnson City, Tenn., will be in the office of Dr. J. B. Hagaman in Boone, on the first Monday in each month for the practice of his profession. 10-17-4t

# "Join Red Cross," Urges Vice President Curtis

America's prominent citizens are urging all men and women to become members of the Red Cross during the period of the special call from Armistice Day to Thanksgiving Day.

The Honorable Charles Curtis, Vice President of the United States, says: "The American Red Cross is in a position to do more to relieve those stricken by misfortune than any other organization in the world. Its splendid work has been made known to all people by the efforts of our countrymen who sustain the American Red Cross. The national organization has enlisted the honest support of all people."

And Mr. W. M. McCreary, Secretary of the Treasury, says: "The one campaign of war or peace disaster that has ever been undertaken in our history. The American Red Cross represents our common sense, our humanity and our noblest instincts. The organization stands ready to do all that is possible to help our countrymen in need in the most efficient and economical manner. The Red Cross is the agency which represents the best of our people and the best of our country."

# Additional Gas Tax Brings in \$2,500,000

The highway fund has received an additional \$2,500,000 from the additional gas tax. The tax was levied on all gasoline sold in the State. The revenue from the tax will be used for the construction and maintenance of highways.

# FEED FOR MILK THIS WINTER. NOT FOR SHELTER COMFORT

Feed for the dairy cow should be used for milk production and body maintenance rather than as a substitute for proper housing.

"When cows are properly exposed to bad weather, a large part of their energy is spent in keeping their bodies warm, leaving only a small portion for milk production," asserts John A. Arey, dairy extension specialist at State College. "What is now at hand and every effort should be made to keep the cows comfortable during the disagreeable periods. If this is not done, profits will be reduced. It is poor economy to substitute feed for shelter at any time, especially this year when there will be some shortage of feed due to dry weather."

Mr. Arey believes the cow stall should be well-lighted, nicely bedded and properly ventilated but free from any currents. He says he has seen many cow barns and sheds in the State of such poor construction that they afford little protection against the cold winter wind. The sides of the barn or shelter should be made tight with the air being admitted through properly located windows.

The practice also of requiring cows to wade through mud and ice to secure drinking water is expensive. This kind of exposure chills the cow's body and prevents her from drinking the amount of water needed for good milk production. A cow weighing from 800 to 900 pounds and producing about 30 pounds of milk a day needs from 85 to 90 pounds of water each day. She will not drink this amount unless it is convenient and of medium temperature, says Mr. Arey.

Weather Man: "Put down rain for a certainty this afternoon."  
Assistant: "Are you positive, sir?"  
Weather Man: "Yes, indeed. I've lost my umbrella, I'm planning to play golf, and my wife's going to a lawn party."

# PASTIME THEATRE

Friday and Saturday, October 30th and November 1st—  
**Bert Lytell and Patsy Ruth Miller**

**"THIS MAD WORLD"**

# Believe It or Not

Fanny Ward, America's most youthful actress, who looks thirty or less years up that she was sixty years old last winter.

# Gov. Gardner Addresses Young Democrats' Club

(Special to The Democrat.)  
Raleigh, N. C.—Governor Gardner addressed the Young Democrats' Club in Winston-Salem, N. C., on Saturday afternoon. He spoke for an hour and a half, discussing the current political situation in the South and the role of the young Democrats. He emphasized the need for unity and reform in the South.

Gov. Gardner said that the South is in a critical position and that the young Democrats must take action. He criticized the current political leadership and called for a new direction. He spoke of the need for economic development and social progress in the South.
