You needn't tell me
—I know Camel is
the fresh cigarette!

**Here's
why
they're FRESH!**

CAMELS are never parched or toasted

THERE is of course a sound reason why the Camel Humidor Pack can deliver to Camel smokers a cigarette that is genuinely fresh.

Camels are made fresh to start with, fresh with natural moisture — blended of the choicest, delicately mild, full-mellow, sun-ripened tobaccos that money can buy.

The full natural goodness of these fine tobaccos is safeguarded at every step in their handling — they are never parched or toasted — the Reynolds method of scientifically applying heat guarantees against that.

That's why we can say with every assurance that

Camels are truly fresh. They're made fresh — not parched or toasted — and then they're kept fresh in the Camel Humidor Pack.

The delights of a genuinely fresh cigarette are so rare and desirable that Camel popularity continues to mount daily to new highs.

Test these delights for yourself — see what true freshness means in cool, slow-burning, delicate mildness — switch to Camels for just one day, then leave them — if you can.

CAMELS

Made FRESH — Kept FRESH

● Don't remove the moisture-proof wrapping from your package of Camels after you open it. The Camel Humidor Pack is protection against perfume and powder odors, dust and germs. In offices and homes, even in the dry atmosphere of artificial heat, the Camel Humidor Pack can be depended upon to deliver fresh Camels every time.
